

We would like to notify you in regards of upcoming vegetation management to be performed on Consumer Energy Transmission Line Right-of-Way. To assist in improving the reliability of the power grid during weather events for you and your community, we will be returning to create a 30' clearance zone by treating brush species under the electrical wires. This program will also create and /or improve wildlife habitat.

We will be utilizing new generation herbicides; Garlon 3A (triclopyr) made by Corteva Agriscience, Garlon 4 Ultra (triclopyr) and Vastlan (triclopyr) made by Corteva Agriscience, Milestone (triisopropanolammonium salt of 2-pyridine carboxylic acid) made by Corteva Agriscience and Freelexx (2,4-D) made by Corteva Agriscience. Re-entry after dry.

Work is Scheduled for the month of Oct – Nov '22

Owen Tree Service HD, Inc. a Great Lakes Area Vegetation Control Contractor
