### **CHARTER TOWNSHIP OF UNION Planning Commission Regular Meeting**

A regular meeting of the Charter Township of Union Planning Commission was held on November 19, 2019 at the Township Hall.

### Meeting was called to order at 7:01 p.m.

### **Roll Call**

Present: Darin, Fuller, LaBelle, Shingles, Squattrito, and Webster Excused: Clerk Cody and Buckley

### **Others Present**

Township Planner, Peter Gallinat and Secretary, Jennifer Loveberry

### **Approval of Minutes**

Webster moved Shingles supported the approval of the October 15, 2019 regular meeting as amended. Vote: Ayes: 6 Nays: 0. Motion carried.

### **Correspondence / Reports/ Presentations**

The Planning Commission received the annual Report from the Zoning Board of Appeals.

### **Approval of Agenda**

Shingles moved LaBelle supported approval of the agenda as presented. Vote: Ayes: 6 Nays 0. Motion carried.

### Public Comment – 7:06 p.m.

Tim Beebe, CMS&D, 2257 Broomfield Rd. - Proposed test amendment to section 30, asked Planning Commissioners to route comments to Township Planner regarding the packet he presented.

Closed 7:09 p.m.

### New Business

### A. SPR 2019-11 (Preliminary Review) D. Clare Services office and storage located at 4491 E. River Rd., PID 14-002-30-013-03 Owner: BGL Holdings LLC

Applicants representative, Tim Beebe, CMS&D, 2257 Broomfield Rd. – presented the preliminary site plan confirming the proposed preliminary site plan located in an I1 district would be a permitted use. On the site plan he showed an existing pole barn structure and proposed an 80'x80' and another 60'x100' building. Outside from the outside agency approvals, the applicant did not receive any other comments from the Planning Commission.

### B. SPR 2019-12 (Preliminary Review) Dunkin Donuts/Filling Station located at S. Isabella Rd., PID 14-026-20-001-06 Owner: McGarry, Robert and Motz, James & Amy

Applicants representative, Sarah Ross, Practical Engineers, Inc. – presented the preliminary site plan located in a B4 district with an approved special use by the Township Board for a filling station. She proposed a 7,200 square foot building with two commercial tenants, each with a separate drive thru

(Tenant #1 Dunkin Donuts, Tenant #2 TBD) on the preliminary site plan. Outside from the outside agency approvals, the applicant did not receive any other comments from the Planning Commission.

### C. 2019 PC Annual Report to the Board of Trustees

Planning Commission reviewed 2019 Annual Report to the Board of Trustees.

### **Other Business**

Planning Commissioners completed their review of Part III sections 11-15 of the Zoning Ordinance Amend/Rewrite.

The Commissioners stated that upon completion of the draft of their recommendations completed by the Consultant, they would welcome any comments from the stakeholders.

### Extended Public Comment Open – 8:56 p.m.

No comments were offered.

### **Final Board Comment**

Webster – Stated that her Planning Commission term ends 2/15/20 and will not be reapplying for another term.

Adjournment – Chairman Squattrito adjourned the meeting at 8:59 p.m.

### **APPROVED BY:**

Alex Fuller - Secretary Mike Darin – Vice Secretary

(Recorded by Jennifer Loveberry)

### NEW BUSINESS

# SUBJECT:A) SUP 2019-07 Sand and Gravel Pit located at S LINCOLN RD MOUNTPLEASANT, MI 48858-0000 PID 14-033-30-006-00 Owner: ZALUD JAMES and DANIEL ZALUD

Applicant: James Zalud and Daniel Zalud

**Owner:** James Zalud and Daniel Zalud

Location: S LINCOLN RD. MOUNT PLEASANT MI 48858-0000

Current Zoning: AG

Adjacent Zoning: AG, AG-1 (Restrictive Agricultural Lincoln Twp)

**Future Land Use/Intent:** *Rural Preservation*: Rural Preservation Areas outside of the growth boundary should be maintained at a low intensity rural character of development that will not adversely impact natural features and agricultural uses. Agriculture should be promoted and future rezoning requests for residential should be prohibited to prevent leapfrog development. **Current Use:** Vacant

Reason for Request: Sand and Gravel Pit

<u>History</u>: Applicant applied for same special use with site plan in January of 2018. The applicant withdrew the application ahead of the scheduled public hearing. (See attached withdrawal letter)

**Objective of board:** Review requirements from sections 30.3.A and 30.4.S of the Zoning Ordinance. Within a reasonable time following the public hearing, the Planning Commission shall review the application for the special use permit, testimony received at the public hearing, and other materials submitted in relation to the request and make a recommendation to the Township Board.

### **Recommendation from Township Planner**

At this time, I would approve SUP 2019 with the following conditions:

- > Final Site Plan approved in accordance with section 12 of the Zoning Ordinance.
- Property screened.
- Assurance of Millbrook Rd maintained.
- Guidelines related to Bald Eagles followed.
- Reclamation materials need to be inert material as described in Part 115, Section 11504 of Act 451 of 1994.

Twp Planner Peter Gallinat Meeting 12/17/19

Dear Jennifer Loveberry,

>

> I am contacting you to urge the committee to vote no on the proposal for a pit at the intersection of Lincoln and Millbrook. I am extremely concerned about the negative impact this will have on the residents who live in the area.

> Thank you so much for hearing my concern, and disseminating my opinion to the committee.

>

> Sincerely,

> Robert Fanning

>

>

>

> Sent from my iPhone

To Whom it May Concern,

As a concerned resident, a caring neighbor, and a voter, I am strongly against the special permit request for a gravel pit on Millbrook road. This permit should absolutely be denied on the basis of how it will adversely impact the families and property owners, as well as the nature environment in the area. That Union Township is even considering this proposal is shameful, and the fact that the permit applicant is himself a member of the committee is a gross misuse of the committee's authority for his own personal gain.

I strongly urge you to vote NO on this permit.

Thank you. Dr. Ari Berk

Ari Berk, Ph.D. Professor of English Central Michigan University www.ariberk.com Dear Ms. Loveberry,

I am unable to attend the meeting tonight so I am writing to be a part of the support of the residents who will be affected by the Millbrook Rd Sand and Gravel Pit. I encourage the board to vote NO for the special use permit.

Sincerely, Annette Thornton 608 Crescent Dr. Mt. Pleasant, MI 48858 From: Kim Smith <ksmith@uniontownshipmi.com>

Subject: Please Vote NO on the Special Use Permit for Millbrook Gravel Pit

Dear Union Township Officials,

I write today as the very concerned friend of the resident most likely to be impacted by the decision about the gravel pit at Millbrook and Lincoln Roads. I understand that when making decisions regarding Special Use Permits, there are many factors to consider. I write today to urge you to give particular attention to the consideration of how this decision will impact the lives of the residents living closest to the pit, above and beyond the financial gain of the township. I am alarmed to read that James Zalud, who has proposed this special use permit, is also on the decision-making board about the fate of this land, and the residents who live nearby. I hope that all members of the board will vote from an informed place, and with their good consciences, and not with allegiance to a fellow board member.

As you proceed toward your votes, I appeal to your human decency and compassion. I ask you simply to put yourself in the shoes (or homes!) of the residents living closest to the proposed pit site and consider the Golden Rule: Do unto others as you would have them do unto you. Would you approve a Sand and Gravel Pit beside your own lifelong family home? Beside your vacation cottage? Beside your mother's home? Would you purchase a home beside an active Sand and Gravel Pit?

No matter where you currently live, please take a moment to imagine the land beside your home being opened up and transformed into an active quarry site. Imagine the incessant noise of heavy machinery working to break up the earth from 7am-7pm every single day, 7 days a week. Imagine trying to sit outside with friends in your once quiet yard, while the loud, clanking and beeping of earth movers is constant. Imagine trying garden, the dust covering your plants, your land and home (not to mention your lungs and your children's lungs). Imagine planning to retire in the next year or two, and \*\*trying\*\* to sell your home in the midst of this chaos. Imagine trying to sell your home EVER again. Imagine losing the only investment you have worked your whole life to pay off, with expectation of selling it one day, and now knowing you've lost the ability to ever sell your home and move elsewhere, along with your peace of mind, and your daily guality of life. These people chose their home in guiet agricultural regions with expectations that they would live in the peaceful country atmosphere. They did not choose to live beside loud and chaotic sand and gravel pits. They STILL DO NOT choose to live beside sand and gravel pits. Just as I suspect none of you would choose either. Ask Mr. Zalud if he would choose to live beside a pit himself, or if he intends to buy the home/s of the people living closest to the site so that they might have any chance at a future option to live away from his proposed environmental catastrophe.

Additional questions I hope are being deeply researched and discussed:

1.) What is the impact of such a site on the local air quality and respiratory health of nearby residents?

2.) What is the potential impact on ground water?

3.) What regulations are placed on refilling the holes with "unusable material"? How can residents know or trust that their local land and water are not going to be contaminated with toxic substances?

4.) Even if the site is returned to agricultural status in 5 years as promised, at what cost to the local eco-system?

**5.)** If you ignore the urging of the residents to deny this permit, what regulations will ensure their quality of life?

Please consider this decision from a health standpoint - both the physical and mental health of local residents, as well as the health of the environment. Do not make this decision lightly, or simply because you are expected to approve a fellow board member's project. Know that this decision will have a great impact on the faith of your community members to believe in you, to believe in the power of local government, or to believe that local government is looking out for the best interests of its residents. Please consider the impact this decision has on the very real, human lives who you are representing, and vote to protect those who depend on you to do so - your residents.

Most Sincerely,

Denise Fanning Mt. Pleasant resident

Subject: Gravel pit

To whom it may concern,

I am extremely opposed to the sand and gravel pit proposed for the lot at Lincoln and Millbrook in Mt. Pleasant. I grew up in the house near that corner on Millbrook and my mother still lives there. The lot is visible from the back yard of her house and from the rooms on that side of the house. It will completely disrupt the peace and quiet we've had there for nearly 24 years. The house she has worked so hard to completely remodel over the years will be virtually worthless with that quarry so close by. The surrounding farm land will be negatively affected, the animals in the area will be displaced including a family of bald eagles who should be protected and not to mention the sly back door politics that are being used to push this gravel pit through are all reasons it shouldn't happen. It is immoral and a conflict of interest for someone to both be on the board for voting this project though and to also greatly financially benefit from the project. We see what's happening here and we do not consent.

Renn Richards

Former resident at 2283 E Millbrook Rd in Mt. Pleasant, MI and concerned citizen

Re: Special Use Permit for Sand and Gravel Pit

Submitted by:

**Denise Richards** 

2283 E. Millbrook Road

Mt. Pleasant, Michigan

I am writing to urge you to decline the application for the Special Use Permit for the forty acres at Millbrook and Lincoln Roads.

First, however, for the record, I would respectfully like to address the applicant's Summary of Request's current false statements regarding the 2017 opposition of the proposed sand and gravel pit. The Summary, page 1, paragraph 3, states "At the time of the 2017 special use submittal, there were individuals, which had sent in photos of bald eagles in and around the area. The indication was that the eagles shown in the photos were all located on the proposed project site and it was implied that this was a nesting area. Some of the eagles photographed may have been on the project site, but based on the landmarks shown in the photos, some were not".

In disputation of these comments, on page 30 of the 2017 packet, the individual in question clearly stated that regards to eagles nesting on the proposed site, "...they are not known to be nesting on this property...". Also, ALL photographs submitted were carefully selected from hundreds of eagle photos taken on the property on Lincoln and Millbrook Roads, to include landmarks in the proposed site area; and do, in fact, exhibit such identifiable landmarks.

Peter Gallinat, Union Township Planner, indicated to me on 12/4/2019 that the first four of the eight criteria in the Special Use Application process are "basically subjective". These criteria are as follows,

1. The special use shall be designed, constructed, operated, and maintained in a manner harmonious with the character of adjacent property and the areas.

2. This special use shall not change the essential character of the surrounding areas.

3. The special use shall not interfere with the general enjoyment of adjacent property.

4. The special use shall not be hazardous to adjacent property or involve uses, activities, materials, or equipment that will be detrimental to the health, safety, or welfare of persons or property through the excessive production of traffic, noise, smoke, odor, fumes, or glare.

I'm wondering why these are considered 'subjective' rather than objective? All of these can be quite easily measured; and, by definition, a sand and gravel pit does not meet any of these criterion while located in an agricultural area: Especially for adjacent private residents and for those in neighboring areas. Yet, the Township Planner seemingly indicated a recommended approval for the special use, with six conditions, at the time of the first submission (See page 2, of 2018 packet).

I'm also wondering whose rights and privileges are taken into consideration when a special use permit is granted? How is this decision process undertaken? I request transparency be offered to the neighboring residents whose everyday lives will be adversely affected: Possibly every day from 7:00am until 7:00pm. Is the motivation for approval a financial decision? If so, for whom? Not for the taxpayers who live near the site, as their property values will plummet. Will the township revise these owners' taxable values if the site is approved?

The Summary of Request states "based on the owners anticipated needs, the activities will occur over approximately a 5 year period." A pertinent question is, why the owners of the the proposed sand and gravel pit needs are greater than the needs of the adjacent property owners? Residents, who, by the way, have the right to assume that purchasing residences near the agricultural zone would allow for open land, open views; and a quiet environment free from the eyesore, noise, road deterioration and pollution of a pit operation. How is this decision-making process undertaken by the commissioners? Whose rights have precedence? I've owned my property for more than twenty years in Union Township: Is longevity a consideration in the decision-making process?

Also, how is an open-ended declaration of "approximately 5 years" measured? Will the commission demand a definite end time to the permit, if they approve it? Will the commission restrict the unimaginable proposed daily hours of operation of 7am-7pm? What enforcement mechanisms will be utilized?

The property in question was placed for sale recently, as indicated by the For Sale sign situated on the corner of Lincoln and Millbrook Roads' electrical pole. Will the township planning commission and/or trustees determine if the special permit is being sought in an attempt to increase the value of that property for sale? And, if so, will the township apply all conditions/restrictions to the potential new owners?

Surrounding agricultural property is for sale by auction on December 11, 2019. This special use permit could set a precedent for the surrounding agricultural properties to initiate sand and gravel pits. This, and subsequent projects then could impact many more people in Union Township, as well residents in surrounding townships and areas. This potential leapfrogging would prove devastatingly detrimental. Would this commission limit the number of township agricultural acres that can be transformed into sand and gravel pits?

There are concerns regarding the "unusable excavated materials will be brought in from the owner's active construction site to refill the excavated areas" (page 1, summary application request). According to the township planner these materials will not be inspected prior to or during refill activities; and, only upon complaints by witnesses would any investigations occur. Will this process also be categorized as "self restricted"? As the suggested time frame of 7am-7pm is "self restricted"? What prevents the area from becoming a landfill? The application is limited in details, and this project sounds to me like a football game with no referees. I am aware that there is a permit process for reuse of materials. But said permit and a special use permit without enforcement procedures are "un-usable".

In the interest of transparency, I'm wondering what is the ratio of special use permits submissions to Union Township, to the number of special use permits granted? Additionally, how many of those granted permits were opposed by the public?

Clearly, I'm adamantly opposed to having a sand and gravel pit operation as a next door neighbor. However, I'm wondering if my rights, and, if my opinion, have any impact on the outcome of the granting of this proposal.

### Mr. Gallinat,

Thank you for meeting with me on Friday and discussing the proposed special use permit application for sand and gravel pit operations. The reclamation of the cell described in the Summary of Request portion of the application is vague in its description. The application states "Un-usable excavated materials will be brought in from the owner's active construction sites to refill the excavated areas." Please ensure the owner understands the reclamation materials need to be inert material as described in Part 115, Section 11504 of Act 451 of 1994. This section generally describes inert material as rock; trees, stumps, and other similar land-clearing debris, which is placed at least 3 feet above the groundwater table; uncontaminated excavated soil; uncontaminated construction brick, masonry, pavement, or broken concrete that does not have exposed reinforcing bar; asphalt or concrete pavement removed from a public right-of-way that has been stockpiled or crushed for reuse as aggregate and does not contain exposed reinforcement bar. If you have any questions, feel free to contact me. Thank you.

Re: Request to Withdraw SUP-2018-01 and Related Site Plan.

Members,

On behalf of the Land Owners James and Daniel Zalud, we wish to formally withdraw the Special Use Application for the +/- 40 acre parcel of land in the Northeast Quadrant of Lincoln and Millbrook Roads, being the Southwest ¼ of the Southwest ¼ of Section 33, T.14 N.- R.04 W., Union Township, Isabella County, Michigan.

Based on the information provided by the public of Bald Eagles frequenting the area, we have looked into the proposed mining activities as it relates to active nesting of Bald Eagles. There are Specific Laws and Guidelines related to active nests and their isolation. The Special Use and Site plan will remain withdrawn until such time that a Qualified Environmental Specialist clears the location and activity and can assure the property owners that no State/Federal Laws and/or Guidelines are being broken.

We appreciate the time and effort that the Planning Commissioners and Township Staff have spent on this item, but we would rather err on the side of caution and withdraw the application.

Submitted on Behalf of, James and Daniel Zalud

Central Michigan Surveying & Development Company, Inc.

Timothy Bebee President

### Summary of Request

This request is for the Special Use of a Sand and Gravel Mining Operation to be allowed within the 40+/- Acre Agricultural Parcel located at the corner of Leaton Road and Millbrook Road. The Requested Special Use will be restricted to the most Northeasterly +/- 10 acres of the overall project site. The sand and aggregate extraction will be staged in the manner shown in the plan set. Based on the owners anticipated needs, the activities will occur over approximately a 5 year period. The active cell(s) are approximately 2.5 acres in size. The first cell will be stripped of topsoil and the screening berms will be built and stabilized. As the cell is mined of its sand and gravel, reclamation of the cell will also be occurring. Un-usable excavated materials will be brought in from the owner's active construction sites to refill the excavated areas. This fill will be placed, bringing the area back to grade and re-top soiled by spreading the topsoil from the screening berms. Final reclamation will be to bring the project area back into agricultural use. Based on the concerns posed by the public during the 2017 special use submittal, the request has been reduce in size and staged in smaller cells. This gives the Township an opportunity to visually see how the overall process will move from extraction to reclamation without opening too large of an area.

Screening and buffering will be completed with berming and distance. The active cells will be approximately 600+ feet away from the adjacent residences. The access drive will be located +/- 600 feet East of Lincoln Road and exit onto Millbrook Road. This means that all activities will be 2 football fields away from the nearest residents.

At the time of the 2017 special use submittal, there were individuals, which had sent in photos of bald eagles in and around the area. The indication was that the eagles shown in the photos were all located on the proposed project site and it was implied that this was a nesting area. Some of the eagles photographed may have been on the project site, but based on the landmarks shown in the photos, some were not. At the time, we were not prepared to address the potential impact on Bald Eagles or their nesting. Since that time, we have obtained the "National Bald Eagle Management Guidelines" by the U.S. Fish and Wildlife Service, dated May 2007. This is a guide that has been "… based on several decades of behavioral observations, science and conservation measures to avoid or minimize adverse impacts to bald eagles." The guide has broken down activities into 8 general categories. Each category has its own isolation distance. Mining falls under Category B. Category B states that a minimum distance of 660 feet should be allowed between the mining operation and an Eagles Nest. We have provided the Guideline Document to Township Staff as a PDF to distribute.

As an example, there is an active eagle's nest just Southeast of Ithaca, Michigan. The new soybean processing plant has been under construction for several years and is adjacent to this nest. The isolation distance was used here to protect the nesting pair. During construction, all means of heavy equipment have been used, including high lift cranes, excavators, dozers, ect.

1

### Give Reason why you feel permit should be granted:

1. The special use shall be designed, constructed, operated, and maintained in a manner harmonious with the character of adjacent property and the surrounding area.

A mining operation is different from the agricultural and residential uses currently adjacent to the parcel. The key to allowing this type of special use is buffering/screening, limiting access points and hours of operation. Mining of sand and gravel will typically occur from the beginning of April to the End of November. The operation will not occur on a continuous basis during this period but will be operated as the need for material arises. The hours of operation will be self restricted to by from 7:00 AM to 7:00 PM.

2. The special use shall not change the essential character of the surrounding area.

During the active mining, there will be a change. However, mining activities will be limited to a 2.5 acre cell for mining at any one time. This will limit the exposure to that change. The closure plan for the project is to bring the parcel full circle back to being a productive agricultural parcel and thus will not change the essential character of the surrounding area once completed.

3. The special use shall not interfere with the general enjoyment of adjacent property.

The special use's design and operation that is being proposed will limit the affect on adjacent parcels and allow the three uses (Agricultural, Residential and Mining) to co-exist. The mining activity will not limit any adjacent property from continuing to function as it always has.

4. The special use shall not be hazardous to adjacent property or involve uses, activities, materials, or equipment that will be detrimental to the health, safety, or welfare of persons or property through the excessive production of traffic, noise, smoke, odor, fumes, or glare.

The proposed design will require the project to be screened, by berming, nearing surrounding the active cell. The berming will create a physical barrier between the project and the adjacent properties. All activities will be a minimum of 50 feet from any property line and more than 2 football fields away from and residence.

5. The special use shall be adequately served by essential public facilities and services; or it shall be demonstrated that the person responsible for the proposed special use shall be able to continually provide adequate services and facilities deemed essential to the special use under consideration. The said facilities or services shall be approved by the Central Michigan District Health Department.

The proposed mining operation will not require these types of public facilities and services. As there is a requirement of no permanent structures to be placed as part of the operation, only a temporary job site bathroom will be placed for employees.

6. When deemed necessary by the Township Board or Planning Commission, the use shall be adequately screened by distance and landscaping to protect the rights of all adjoining property.

As part of the Special Use Criteria for mining operations, specific expanded setbacks or buffers are already required.

7. The Township Board or Planning Commission, in connection with approval of any application, may require reasonable undertaking by the applicant to guarantee and assure by agreement, including a performance bond to be posted by the applicant or by some other reasonable surety arrangement at appropriate stages of the planned development, that the development will be executed in accordance with the approved plan.

The Owner/Operator would be happy to discuss these types of additional requirements.

8. That such use will be an asset to the Township.

Although a sand and gravel mining operation may not be the most desirable neighbor for everyone, there is a need for a reliable source of construction grade material within the Township. This location, being within Union Township and its proximity to the developing portions of the City of Mt. Pleasant and Central Michigan University will be an asset to the Township, the City and CMU.

3

### UNION TOWNSHIP PUBLIC HEARING NOTICE -SPECIAL USE PERMIT

NOTICE is hereby given that a Public Hearing will be held on Tuesday, December 17, 2019, at 7:00 p.m. at the Union Township Hall located at 2010 South Lincoln Road, Mt. Pleasant, Michigan, before the Union Township Planning Commission for the purpose of hearing any interested persons in the following request for a Special Use Permit, as allowed by the Union Township Zoning Ordinance 1991-5 as amended.

Requested by **James Zalud and Daniel Zalud**, a Special Use Permit in an AG (Agricultural District) for a Sand and Gravel Pit

Legal Description of property: T14N R4W, SEC 33; SW 1/4 OF SW 1/4

This property is located at: S. Lincoln Rd. MT PLEASANT, MI 48858 PID 14-033-30-006-00

All interested persons may submit their views in person, in writing, or by signed proxy prior to the public hearing or at the public hearing.

All materials concerning this request may be seen at the Union Township Hall, located at 2010 S. Lincoln Road, Mt. Pleasant, Michigan, between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday. Phone (989) 772 4600 extension 241.

Peter Gallinat, Township Planner

The above parcel highlighted in GREEN is the subject parcel PID 14-033-30-006-00. Corner of Lincoln and Millbrook Rd.

The YELLOW border represents a 300ft radius. Property owners within the 300ft radius are sent notice of the public hearing.

### INTRODUCTION

The bald eagle (*Haliaeetus leucocephalus*) is protected by the Bald and Golden Eagle Protection Act (Eagle Act) and the Migratory Bird Treaty Act (MBTA). The MBTA and the Eagle Act protect bald eagles from a variety of harmful actions and impacts. The U.S. Fish and Wildlife Service (Service) developed these National Bald Eagle Management Guidelines to advise landowners, land managers, and others who share public and private lands with bald eagles when and under what circumstances the protective provisions of the Eagle Act may apply to their activities. A variety of human activities can potentially interfere with bald eagles, affecting their ability to forage, nest, roost, breed, or raise young. The Guidelines are intended to help people minimize such impacts to bald eagles, particularly where they may constitute "disturbance," which is prohibited by the Eagle Act.

The Guidelines are intended to:

(1) Publicize the provisions of the Eagle Act that continue to protect bald eagles, in order to reduce the possibility that people will violate the law,

(2) Advise landowners, land managers and the general public of the potential for various human activities to disturb bald eagles, and

(3) Encourage additional nonbinding land management practices that benefit bald eagles (see Additional Recommendations section).

While the Guidelines include general recommendations for land management practices that will benefit bald eagles, the document is intended primarily as a tool for landowners and planners who seek information and recommendations regarding how to avoid disturbing bald eagles. Many States and some tribal entities have developed state-specific management plans, regulations, and/or guidance for landowners and land managers to protect and enhance bald eagle habitat, and we encourage the continued development and use of these planning tools to benefit bald eagles.

Adherence to the Guidelines herein will benefit individuals, agencies, organizations, and companies by helping them avoid violations of the law. However, the Guidelines themselves are not law. Rather, they are recommendations based on several decades of behavioral observations, science, and conservation measures to avoid or minimize adverse impacts to bald eagles.

The U.S. Fish and Wildlife Service strongly encourages adherence to these guidelines to ensure that bald and golden eagle populations will continue to be sustained. The Service realizes there may be impacts to some birds even if all reasonable measures are taken to avoid such impacts. Although it is not possible to absolve individuals and entities from liability under the Eagle Act or the MBTA, the Service exercises enforcement discretion to focus on those individuals, companies, or agencies that take migratory birds without regard for the consequences of their actions and the law, especially when conservation measures, such as these Guidelines, are available, but have not been implemented. The Service will prioritize its enforcement efforts to focus on those individuals or entities who take bald eagles or their parts, eggs, or nests without implementing appropriate measures recommended by the Guidelines.

National Bald Eagle Management Guidelines

The Service intends to pursue the development of regulations that would authorize, under limited circumstances, the use of permits if "take" of an eagle is anticipated but unavoidable. Additionally, if the bald eagle is delisted, the Service intends to provide a regulatory mechanism to honor existing (take) authorizations under the Endangered Species Act (ESA).

During the interim period until the Service completes a rulemaking for permits under the Eagle Act, the Service does not intend to refer for prosecution the incidental "*take*" of any bald eagle under the MBTA or Eagle Act, if such take is in full compliance with the terms and conditions of an incidental take statement issued to the action agency or applicant under the authority of section 7(b)(4) of the ESA or a permit issued under the authority of section 10(a)(1)(B) of the ESA.

The Guidelines are applicable throughout the United States, including Alaska. The primary purpose of these Guidelines is to provide information that will minimize or prevent violations only of *Federal* laws governing bald eagles. In addition to Federal laws, many states and some smaller jurisdictions and tribes have additional laws and regulations protecting bald eagles. In some cases those laws and regulations may be more protective (restrictive) than these Federal guidelines. If you are planning activities that may affect bald eagles, we therefore recommend that you contact both your nearest U.S. Fish and Wildlife Service Field Office (see the contact information on p.16) and your state wildlife agency for assistance.

### LEGAL PROTECTIONS FOR THE BALD EAGLE

### The Bald and Golden Eagle Protection Act

The Eagle Act (16 U.S.C. 668-668c), enacted in 1940, and amended several times since then, prohibits anyone, without a permit issued by the Secretary of the Interior, from "taking" bald eagles, including their parts, nests, or eggs. The Act provides criminal and civil penalties for persons who "take, possess, sell, purchase, barter, offer to sell, purchase or barter, transport, export or import, at any time or any manner, any bald eagle ... [or any golden eagle], alive or dead, or any part, nest, or egg thereof." The Act defines "take" as "pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest or disturb." "Disturb" means:

"Disturb means to agitate or bother a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available, 1) injury to an eagle, 2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or 3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior."

In addition to immediate impacts, this definition also covers impacts that result from human-induced alterations initiated around a previously used nest site during a time when eagles are not present, if, upon the eagle=s return, such alterations agitate or bother an eagle to a degree that injures an eagle or substantially interferes with normal breeding, feeding, or sheltering habits and causes, or is likely to cause, a loss of productivity or nest abandonment.

A violation of the Act can result in a criminal fine of \$100,000 (\$200,000 for organizations), imprisonment for one year, or both, for a first offense. Penalties increase substantially for additional offenses, and a second violation of this Act is a felony.

#### The Migratory Bird Treaty Act

The MBTA (16 U.S.C. 703-712), prohibits the taking of any migratory bird or any part, nest, or egg, except as permitted by regulation. The MBTA was enacted in 1918; a 1972 agreement supplementing one of the bilateral treaties underlying the MBTA had the effect of expanding the scope of the Act to cover bald eagles and other raptors. Implementing regulations define "take" under the MBTA as "pursue, hunt, shoot, wound, kill, trap, capture, possess, or collect."

Copies of the Eagle Act and the MBTA are available at: http://permits.fws.gov/ltr/ltr.shtml.

#### State laws and regulations

Most states have their own regulations and/or guidelines for bald eagle management. Some states may continue to list the bald eagle as endangered, threatened, or of special concern. If you plan activities that may affect bald eagles, we urge you to familiarize yourself with the regulations and/or guidelines that apply to bald eagles in your state. Your adherence to the Guidelines herein does not ensure that you are in compliance with state laws and regulations because state regulations can be more specific and/or restrictive than these Guidelines.

#### NATURAL HISTORY OF THE BALD EAGLE

Bald eagles are a North American species that historically occurred throughout the contiguous United States and Alaska. After severely declining in the lower 48 States between the 1870s and the 1970s, bald eagles have rebounded and re-established breeding territories in each of the lower 48 states. The largest North American breeding populations are in Alaska and Canada, but there are also significant bald eagle populations in Florida, the Pacific Northwest, the Greater Yellowstone area, the Great Lakes states, and the Chesapeake Bay region. Bald eagle distribution varies seasonally. Bald eagles that nest in southern latitudes frequently move northward in late spring and early summer, often summering as far north as Canada. Most eagles that breed at northern latitudes migrate southward during winter, or to coastal areas where waters remain unfrozen. Migrants frequently concentrate in large numbers at sites where food is abundant and they often roost together communally. In some cases, concentration areas are used year-round: in summer by southern eagles and in winter by northern eagles.

Juvenile bald eagles have mottled brown and white plumage, gradually acquiring their dark brown body and distinctive white head and tail as they mature. Bald eagles generally attain adult plumage by 5 years of age. Most are capable of breeding at 4 or 5 years of age, but in healthy populations they may not start breeding until much older. Bald eagles may live 15 to 25 years in the wild. Adults weigh 8 to 14 pounds (occasionally reaching 16 pounds in Alaska) and have wingspans of 5 to 8 feet. Those in the northern range are larger than those in the south, and females are larger than males.

National Bald Eagle Management Guidelines

#### Where do bald eagles nest?

Breeding bald eagles occupy "territories," areas they will typically defend against intrusion by other eagles. In addition to the active nest, a territory may include one or more alternate nests (nests built or maintained by the eagles but not used for nesting in a given year). The Eagle Act prohibits removal or destruction of both active and alternate bald eagle nests. Bald eagles exhibit high nest site fidelity and nesting territories are often used year after year. Some territories are known to have been used continually for over half a century.

Bald eagles generally nest near coastlines, rivers, large lakes or streams that support an adequate food supply. They often nest in mature or old-growth trees; snags (dead trees); cliffs; rock promontories; rarely on the ground; and with increasing frequency on human-made structures such as power poles and communication towers. In forested areas, bald eagles often select the tallest trees with limbs strong enough to support a nest that can weigh more than 1,000 pounds. Nest sites typically include at least one perch with a clear view of the water where the eagles usually forage. Shoreline trees or snags located in reservoirs provide the visibility and accessibility needed to locate aquatic prey. Eagle nests are constructed with large sticks, and may be lined with moss, grass, plant stalks, lichens, seaweed, or sod. Nests are usually about 4-6 feet in diameter and 3 feet deep, although larger nests exist.

Copyright Birds of North America, 2000

The range of breeding bald eagles in 2000 (shaded areas). This map shows only the larger concentrations of nests; eagles have continued to expand into additional nesting territories in many states. The dotted line represents the bald eagle's wintering range.

#### When do bald eagles nest?

Nesting activity begins several months before egg-laying. Egg-laying dates vary throughout the U.S., ranging from October in Florida, to late April or even early May in the northern United States. Incubation typically lasts 33-35 days, but can be as long as 40 days. Eaglets make their first unsteady flights about 10 to 12 weeks after hatching, and fledge (leave their nests) within a few days after that first flight. However, young birds usually remain in the vicinity of the nest for several weeks after fledging because they are almost completely dependent on their parents for food until they disperse from the nesting territory approximately 6 weeks later.

The bald eagle breeding season tends to be longer in the southern U.S., and re-nesting following an unsuccessful first nesting attempt is more common there as well. The following table shows the timing of bald eagle breeding seasons in different regions of the country. The table represents the range of time within which the majority of nesting activities occur in each region and does not apply to any specific nesting pair. Because the timing of nesting activities may vary within a given region, you should contact the nearest U.S. Fish and Wildlife Service Field Office (see page 16) and/or your state wildlife conservation agency for more specific information on nesting chronology in your area.

#### How many chicks do bald eagles raise?

The number of eagle eggs laid will vary from 1-3, with 1-2 eggs being the most common. Only one eagle egg is laid per day, although not always on successive days. Hatching of young occurs on different days with the result that chicks in the same nest are sometimes of unequal size. The overall national fledging rate is approximately one chick per nest, annually, which results in a healthy expanding population.

#### What do bald eagles eat?

Bald eagles are opportunistic feeders. Fish comprise much of their diet, but they also eat waterfowl, shorebirds/colonial waterbirds, small mammals, turtles, and carrion. Because they are visual hunters, eagles typically locate their prey from a conspicuous perch, or soaring flight, then swoop down and strike. Wintering bald eagles often congregate in large numbers along streams to feed on spawning salmon or other fish species, and often gather in large numbers in areas below reservoirs, especially hydropower dams, where fish are abundant. Wintering eagles also take birds from rafts of ducks at reservoirs and rivers, and congregate on melting ice shelves to scavenge dead fish from the current or the soft melting ice. Bald eagles will also feed on carcasses along roads, in landfills, and at feedlots.

During the breeding season, adults carry prey to the nest to feed the young. Adults feed their chicks by tearing off pieces of food and holding them to the beaks of the eaglets. After fledging, immature eagles are slow to develop hunting skills, and must learn to locate reliable food sources and master feeding techniques. Young eagles will congregate together, often feeding upon easily acquired food such as carrion and fish found in abundance at the mouths of streams and shallow bays and at landfills.

#### The impact of human activity on nesting bald eagles

During the breeding season, bald eagles are sensitive to a variety of human activities. However, not all bald eagle pairs react to human activities in the same way. Some pairs nest successfully just dozens of yards from human activity, while others abandon nest sites in response to activities much farther away. This variability may be related to a number of factors, including visibility, duration, noise levels, extent of the area affected by the activity, prior experiences with humans, and tolerance of the individual nesting pair. The relative sensitivity of bald eagles during various stages of the breeding season is outlined in the following table.

Phase	Activity	Sensitivity to Human Activity	Comments
I	Courtship and Nest Building	Most sensitive period; likely to respond negatively	Most critical time period. Disturbance is manifested in nest abandonment. Bald eagles in newly established territories are more prone to abandon nest sites.
н	Egg laying	Very sensitive period	Human activity of even limited duration may cause nest desertion and abandonment of territory for the breeding season.
111	Incubation and early nestling period (up to 4 weeks)	Very sensitive period	Adults are less likely to abandon the nest near and after hatching. However, flushed adults leave eggs and young unattended; eggs are susceptible to cooling, loss of moisture, overheating, and predation; young are vulnerable to elements.
IV	Nestling period, 4 to 8 weeks	Moderately sensitive period	Likelihood of nest abandonment and vulnerability of the nestlings to elements somewhat decreases. However, nestlings may miss feedings, affecting their survival.
v	Nestlings 8 weeks through fledging	Very sensitive period	Gaining flight capability, nestlings 8 weeks and older may flush from the nest prematurely due to disruption and die.

Nesting Bald Eagle Sensitivity to Human Activities

If agitated by human activities, eagles may inadequately construct or repair their nest, may expend energy defending the nest rather than tending to their young, or may abandon the nest altogether. Activities that cause prolonged absences of adults from their nests can jeopardize eggs or young. Depending on weather conditions, eggs may overheat or cool too much and fail to hatch. Unattended eggs and nestlings are subject to predation. Young nestlings are particularly vulnerable because they rely on their parents to provide warmth or shade, without which they may die as a result of hypothermia or heat stress. If food delivery schedules are interrupted, the young may not develop healthy plumage, which can affect their survival. In addition, adults startled while incubating or brooding young may damage eggs or injure their young as they abruptly leave the nest. Older nestlings no longer require constant attention from the adults, but they may be startled by loud or intrusive human activities and prematurely jump from the nest before they are able to fly or care for themselves. Once fledged, juveniles range up to ¼ mile from the nest site, often to a site with minimal human activity. During this period, until about six weeks after departure from the nest, the juveniles still depend on the adults to feed them.

#### The impact of human activity on foraging and roosting bald eagles

Disruption, destruction, or obstruction of roosting and foraging areas can also negatively affect bald eagles. Disruptive activities in or near eagle foraging areas can interfere with feeding, reducing chances of survival. Interference with feeding can also result in reduced productivity (number of young successfully fledged). Migrating and wintering bald eagles often congregate at specific sites for purposes of feeding and sheltering. Bald eagles rely on established roost sites because of their proximity to sufficient food sources. Roost sites are usually in mature trees where the eagles are somewhat sheltered from the wind and weather. Human activities near or within communal roost sites may prevent eagles

from feeding or taking shelter, especially if there are not other undisturbed and productive feeding and roosting sites available. Activities that permanently alter communal roost sites and important foraging areas can altogether eliminate the elements that are essential for feeding and sheltering eagles.

Where a human activity agitates or bothers roosting or foraging bald eagles to the degree that causes injury or substantially interferes with breeding, feeding, or sheltering behavior and causes, or is likely to cause, a loss of productivity or nest abandonment, the conduct of the activity constitutes a violation of the Eagle Act's prohibition against disturbing eagles. The circumstances that might result in such an outcome are difficult to predict without detailed site-specific information. If your activities may disturb roosting or foraging bald eagles, you should contact your local Fish and Wildlife Service Field Office (see page 16) for advice and recommendations for how to avoid such disturbance.

#### **RECOMMENDATIONS FOR AVOIDING DISTURBANCE AT NEST SITES**

In developing these Guidelines, we relied on existing state and regional bald eagle guidelines, scientific literature on bald eagle disturbance, and recommendations of state and Federal biologists who monitor the impacts of human activity on eagles. Despite these resources, uncertainties remain regarding the effects of many activities on eagles and how eagles in different situations may or may not respond to certain human activities. The Service recognizes this uncertainty and views the collection of better biological data on the response of eagles to disturbance as a high priority. To the extent that resources allow, the Service will continue to collect data on responses of bald eagles to human activities conducted according to the recommendations within these Guidelines to ensure that adequate protection from disturbance is being afforded, and to identify circumstances where the Guidelines might be modified. These data will be used to make future adjustments to the Guidelines.

To avoid disturbing nesting bald eagles, we recommend (1) keeping a distance between the activity and the nest (distance buffers), (2) maintaining preferably forested (or natural) areas between the activity and around nest trees (landscape buffers), and (3) avoiding certain activities during the breeding season. The buffer areas serve to minimize visual and auditory impacts associated with human activities near nest sites. Ideally, buffers would be large enough to protect existing nest trees and provide for alternative or replacement nest trees.

The size and shape of effective buffers vary depending on the topography and other ecological characteristics surrounding the nest site. In open areas where there are little or no forested or topographical buffers, such as in many western states, distance alone must serve as the buffer. Consequently, in open areas, the distance between the activity and the nest may need to be larger than the distances recommended under Categories A and B of these guidelines (pg. 12) if no landscape buffers are present. The height of the nest above the ground may also ameliorate effects of human activities; eagles at higher nests may be less prone to disturbance.

In addition to the physical features of the landscape and nest site, the appropriate size for the distance buffer may vary according to the historical tolerances of eagles to human activities in particular localities, and may also depend on the location of the nest in relation to feeding and roosting areas used by the eagles. Increased competition for nest sites may lead bald eagles to nest closer to human activity (and other eagles).

Seasonal restrictions can prevent the potential impacts of many shorter-term, obtrusive activities that do not entail landscape alterations (e.g. fireworks, outdoor concerts). In proximity to the nest, these kinds of activities should be conducted only outside the breeding season. For activities that entail both short-term, obtrusive characteristics and more permanent impacts (e.g., building construction), we recommend a combination of both approaches: retaining a landscape buffer *and* observing seasonal restrictions.

For assistance in determining the appropriate size and configuration of buffers or the timing of activities in the vicinity of a bald eagle nest, we encourage you to contact the nearest U.S. Fish and Wildlife Service Field Office (see page 16).

#### **Existing Uses**

Eagles are unlikely to be disturbed by routine use of roads, homes, and other facilities where such use pre-dates the eagles' successful nesting activity in a given area. Therefore, in most cases *ongoing* existing uses may proceed with the same intensity with little risk of disturbing bald eagles. However, some *intermittent, occasional, or irregular* uses that pre-date eagle nesting in an area may disturb bald eagles. For example: a pair of eagles may begin nesting in an area and subsequently be disturbed by activities associated with an annual outdoor flea market, even though the flea market has been held annually at the same location. In such situations, human activity should be adjusted or relocated to minimize potential impacts on the nesting pair.

#### ACTIVITY-SPECIFIC GUIDELINES

The following section provides the Service=s management recommendations for avoiding bald eagle disturbance as a result of new or intermittent activities proposed in the vicinity of bald eagle nests. Activities are separated into 8 categories (A - H) based on the nature and magnitude of impacts to bald eagles that usually result from the type of activity. Activities with similar or comparable impacts are grouped together.

In most cases, impacts will vary based on the visibility of the activity from the eagle nest and the degree to which similar activities are already occurring in proximity to the nest site. Visibility is a factor because, in general, eagles are more prone to disturbance when an activity occurs in full view. For this reason, we recommend that people locate activities farther from the nest structure in areas with open vistas, in contrast to areas where the view is shielded by rolling topography, trees, or other screening factors. The recommendations also take into account the existence of similar activities in the area because the continued presence of nesting bald eagles in the vicinity of the existing activities indicates that the eagles in that area can tolerate a greater degree of human activity than we can generally expect from eagles in areas that experience fewer human impacts. To illustrate how these factors affect the likelihood of disturbing eagles, we have incorporated the recommendations for some activities into a table (categories A and B).

First, determine which category your activity falls into (between categories A - H). If the activity you plan to undertake is not specifically addressed in these guidelines, follow the recommendations for the most similar activity represented.

If your activity is under A or B, our recommendations are in table form. The vertical axis shows the degree of visibility of the activity from the nest. The horizontal axis (header row) represents the degree to which similar activities are ongoing in the vicinity of the nest. Locate the row that best describes how visible your activity will be from the eagle nest. Then, choose the column that best describes the degree to which similar activities are ongoing in the vicinity of the eagle nest. The box where the column and row come together contains our management recommendations for how far you should locate your activity from the nest to avoid disturbing the eagles. The numerical distances shown in the tables are the closest the activity should be conducted relative to the nest. In some cases we have included additional recommendations (other than recommended *distance* from the nest) you should follow to help ensure that your activity will not disturb the eagles.

#### Alternate nests

For activities that entail permanent landscape alterations that may result in bald eagle disturbance, these recommendations apply to both active and alternate bald eagle nests. Disturbance becomes an issue with regard to alternate nests if eagles return for breeding purposes and react to land use changes that occurred while the nest was inactive. The likelihood that an alternate nest will again become active decreases the longer it goes unused. If you plan activities in the vicinity of an alternate bald eagle nest and have information to show that the nest has not been active during the preceding 5 breeding seasons, the recommendations provided in these guidelines for avoiding disturbance around the nest site may no longer be warranted. The nest itself remains protected by other provisions of the Eagle Act, however, and may not be destroyed.

If special circumstances exist that make it unlikely an inactive nest will be reused before 5 years of disuse have passed, and you believe that the probability of reuse is low enough to warrant disregarding the recommendations for avoiding disturbance, you should be prepared to provide all the reasons for your conclusion, including information regarding past use of the nest site. Without sufficient documentation, you should continue to follow these guidelines when conducting activities around the nest site. If we are able to determine that it is unlikely the nest will be reused, we may advise you that the recommendations provided in these guidelines for avoiding disturbance are no longer necessary around that nest site.

This guidance is intended to minimize disturbance, as defined by Federal regulation. In addition to Federal laws, most states and some tribes and smaller jurisdictions have additional laws and regulations protecting bald eagles. In some cases those laws and regulations may be more protective (restrictive) than these Federal guidelines.

#### **Temporary Impacts**

For activities that have temporary impacts, such as the use of loud machinery, fireworks displays, or summer boating activities, we recommend seasonal restrictions. These types of activities can generally be carried out outside of the breeding season without causing disturbance. The recommended restrictions for these types of activities can be lifted for alternate nests within a particular territory, including nests that were attended during the current breeding season but not used to raise young, after eggs laid in another nest within the territory have hatched (depending on the distance between the alternate nest and the active nest).

In general, activities should be kept as far away from nest trees as possible; loud and disruptive activities should be conducted when eagles are not nesting; and activity between the nest and the nearest foraging area should be minimized. If the activity you plan to undertake is not specifically addressed in these guidelines, follow the recommendations for the most similar activity addressed, or contact your local U.S. Fish and Wildlife Service Field Office for additional guidance.

If you believe that special circumstances apply to your situation that increase or diminish the likelihood of bald eagle disturbance, or if it is not possible to adhere to the guidelines, you should contact your local Service Field Office for further guidance.

#### Category A:

Building construction, 1 or 2 story, with project footprint of ½ acre or less. Construction of roads, trails, canals, power lines, and other linear utilities. Agriculture and aquaculture – new or expanded operations. Alteration of shorelines or wetlands. Installation of docks or moorings. Water impoundment.

#### Category B:

Building construction, 3 or more stories. Building construction, 1 or 2 story, with project footprint of more than ½ acre. Installation or expansion of marinas with a capacity of 6 or more boats. Mining and associated activities.

Oil and natural gas drilling and refining and associated activities.

	<i>If there is no similar activity within 1 mile of the nest</i>	If there is similar activity closer than 1 mile from the nest
<i>If the activity will be visible from the nest</i>	660 feet. Landscape buffers are recommended.	660 feet, or as close as existing tolerated activity of similar scope. Landscape buffers are recommended.
<i>If the activity will not be visible from the nest</i>	Category A: 330 feet. Clearing, external construction, and landscaping between 330 feet and 660 feet should be done outside breeding season. Category B: 660 feet.	330 feet, or as close as existing tolerated activity of similar scope. Clearing, external construction and landscaping within 660 feet should be done outside breeding season.

The numerical distances shown in the table are the closest the activity should be conducted relative to the nest.

#### Category C. Timber Operations and Forestry Practices

- Avoid clear cutting or removal of overstory trees within 330 feet of the nest at any time.
- Avoid timber harvesting operations, including road construction and chain saw and yarding operations, during the breeding season within 660 feet of the nest. The distance may be decreased to 330 feet around alternate nests within a particular territory, including nests that were attended during the current breeding season but not used to raise young, after eggs laid in another nest within the territory have hatched.
- Selective thinning and other silviculture management practices designed to conserve or enhance habitat, including prescribed burning close to the nest tree, should be undertaken outside the breeding season. Precautions such as raking leaves and woody debris from around the nest tree should be taken to prevent crown fire or fire climbing the nest tree. If it is determined that a burn during the breeding season would be beneficial, then, to ensure that no take or disturbance will occur, these activities should be conducted only when neither adult eagles nor young are present at the nest tree (i.e., at the beginning of, or end of, the breeding season, either before the particular nest is active or after the young have fledged from that nest). Appropriate Federal and state biologists should be consulted before any prescribed burning is conducted during the breeding season.
- Avoid construction of log transfer facilities and in-water log storage areas within 330 feet of the nest.

**Category D. Off-road vehicle use** (including snowmobiles). No buffer is necessary around nest sites outside the breeding season. During the breeding season, do not operate off-road vehicles within 330 feet of the nest. In open areas, where there is increased visibility and exposure to noise, this distance should be extended to 660 feet.

**Category E. Motorized Watercraft use** (including jet skis/personal watercraft). No buffer is necessary around nest sites outside the breeding season. During the breeding season, within 330 feet of the nest, (1) do not operate jet skis (personal watercraft), and (2) avoid concentrations of noisy vessels (e.g., commercial fishing boats and tour boats), except where eagles have demonstrated tolerance for such activity. Other motorized boat traffic passing within 330 feet of the nest should attempt to minimize trips and avoid stopping in the area where feasible, particularly where eagles are unaccustomed to boat traffic. Buffers for airboats should be larger than 330 feet due to the increased noise they generate, combined with their speed, maneuverability, and visibility.

**Category F. Non-motorized recreation and human entry** (e.g., hiking, camping, fishing, hunting, birdwatching, kayaking, canoeing). No buffer is necessary around nest sites outside the breeding season. If the activity will be visible or highly audible from the nest, maintain a 330-foot buffer during the breeding season, particularly where eagles are unaccustomed to such activity.

#### Category G. Helicopters and fixed-wing aircraft.

Except for authorized biologists trained in survey techniques, avoid operating aircraft within 1,000 feet of the nest during the breeding season, except where eagles have demonstrated tolerance for such activity.

#### Category H. Blasting and other loud, intermittent noises.

Avoid blasting and other activities that produce extremely loud noises within 1/2 mile of active nests, unless greater tolerance to the activity (or similar activity) has been demonstrated by the eagles in the nesting area. This recommendation applies to the use of fireworks classified by the Federal Department of Transportation as Class B explosives, which includes the larger fireworks that are intended for licensed public display.

#### RECOMMENDATIONS FOR AVOIDING DISTURBANCE AT FORAGING AREAS AND COMMUNAL ROOST SITES

- 1. Minimize potentially disruptive activities and development in the eagles' direct flight path between their nest and roost sites and important foraging areas.
- 2. Locate long-term and permanent water-dependent facilities, such as boat ramps and marinas, away from important eagle foraging areas.
- Avoid recreational and commercial boating and fishing near critical eagle foraging areas during peak feeding times (usually early to mid-morning and late afternoon), except where eagles have demonstrated tolerance to such activity.
- Do not use explosives within ½ mile (or within 1 mile in open areas) of communal roosts when eagles are congregating, without prior coordination with the U.S. Fish and Wildlife Service and your state wildlife agency.
- 5. Locate aircraft corridors no closer than 1,000 feet vertical or horizontal distance from communal roost sites.

#### ADDITIONAL RECOMMENDATIONS TO BENEFIT BALD EAGLES

The following are additional management practices that landowners and planners can exercise for added benefit to bald eagles.

- 1. Protect and preserve potential roost and nest sites by retaining mature trees and old growth stands, particularly within ½ mile from water.
- 2. Where nests are blown from trees during storms or are otherwise destroyed by the elements, continue to protect the site in the absence of the nest for up to three (3) complete breeding seasons. Many eagles will rebuild the nest and reoccupy the site.
- 3. To avoid collisions, site wind turbines, communication towers, and high voltage transmission power lines away from nests, foraging areas, and communal roost sites.
- 4. Employ industry-accepted best management practices to prevent birds from colliding with or being electrocuted by utility lines, towers, and poles. If possible, bury utility lines in important eagle areas.
- 5. Where bald eagles are likely to nest in human-made structures (e.g., cell phone towers) and such use could impede operation or maintenance of the structures or jeopardize the safety of the eagles, equip the structures with either (1) devices engineered to discourage bald eagles from building nests, or (2) nesting platforms that will safely accommodate bald eagle nests without interfering with structure performance.
- 6. Immediately cover carcasses of euthanized animals at landfills to protect eagles from being poisoned.
- 7. Do not intentionally feed bald eagles. Artificially feeding bald eagles can disrupt their essential behavioral patterns and put them at increased risk from power lines, collision with windows and cars, and other mortality factors.
- 8. Use pesticides, herbicides, fertilizers, and other chemicals only in accordance with Federal and state laws.
- 9. Monitor and minimize dispersal of contaminants associated with hazardous waste sites (legal or illegal), permitted releases, and runoff from agricultural areas, especially within watersheds where eagles have shown poor reproduction or where bioaccumulating contaminants have been documented. These factors present a risk of contamination to eagles and their food sources.

.

#### CONTACTS

The following U.S. Fish and Wildlife Service Field Offices provide technical assistance on bald eagle management:

#### State Agencies

To contact a state wildlife agency, visit the Association of Fish & Wildlife Agencies' website at http://www.fishwildlife.org/where\_us.html

#### GLOSSARY

The definitions below apply to these National Bald Eagle Management Guidelines:

**Communal roost sites** – Areas where bald eagles gather and perch overnight – and sometimes during the day in the event of inclement weather. Communal roost sites are usually in large trees (live or dead) that are relatively sheltered from wind and are generally in close proximity to foraging areas. These roosts may also serve a social purpose for pair bond formation and communication among eagles. Many roost sites are used year after year.

**Disturb** – To agitate or bother a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available, 1) injury to an eagle, 2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or 3) nest abandonment, by substantially interfering with normal breeding, feeding, feeding, or sheltering behavior.

In addition to immediate impacts, this definition also covers impacts that result from humancaused alterations initiated around a previously used nest site during a time when eagles are not present, if, upon the eagle=s return, such alterations agitate or bother an eagle to a degree that injures an eagle or substantially interferes with normal breeding, feeding, or sheltering habits and causes, or is likely to cause, a loss of productivity or nest abandonment.

**Fledge** – To leave the nest and begin flying. For bald eagles, this normally occurs at 10-12 weeks of age.

**Fledgling** – A juvenile bald eagle that has taken the first flight from the nest but is not yet independent.

**Foraging area** – An area where eagles feed, typically near open water such as rivers, lakes, reservoirs, and bays where fish and waterfowl are abundant, or in areas with little or no water (i.e., rangelands, barren land, tundra, suburban areas, etc.) where other prey species (e.g., rabbit, rodents) or carrion (such as at landfills) are abundant.

**Landscape buffer** – A natural or human-made landscape feature that screens eagles from human activity (e.g., strip of trees, hill, cliff, berm, sound wall).

**Nest** – A structure built, maintained, or used by bald eagles for the purpose of reproduction. An **active** nest is a nest that is attended (built, maintained or used) by a pair of bald eagles during a given breeding season, whether or not eggs are laid. An **alternate** nest is a nest that is not used for breeding by eagles during a given breeding season.

**Nest abandonment** – Nest abandonment occurs when adult eagles desert or stop attending a nest and do not subsequently return and successfully raise young in that nest for the duration of a breeding season. Nest abandonment can be caused by altering habitat near a nest, even if the alteration occurs prior to the breeding season. Whether the eagles migrate during the non-breeding season, or remain in the area throughout the non-breeding season, nest abandonment can occur at any point between the time the eagles return to the nesting site for the breeding season and the time when all progeny from the breeding season have National Bald Eagle Management Guidelines

#### dispersed.

**Project footprint** – The area of land (and water) that will be permanently altered for a development project, including access roads.

**Similar scope** – In the vicinity of a bald eagle nest, an existing activity is of similar scope to a new activity where the types of impacts to bald eagles are similar in nature, and the impacts of the existing activity are of the same or greater magnitude than the impacts of the potential new activity. Examples: (1) An existing single-story home 200 feet from a nest is similar in scope to an additional single-story home 200 feet from the nest; (2) An existing multi-story, multi-family dwelling 150 feet from a nest has impacts of a greater magnitude than a potential new single-family home 200 feet from the nest; (3) One existing single-family home 200 feet from the nest; (4) an existing single-family home 200 feet from a communal roost has impacts of a lesser magnitude than a single-family home 300 feet from the nest; (4) an existing single-family home 300 feet from a nest has impacts of a lesser magnitude than three single-family homes 200 feet from the nest; (4) an existing single-family home 300 feet from a nest has impacts of a lesser magnitude than three single-family homes 200 feet from the nest; (4) an existing single-family home 300 feet from a communal roost has impacts of a lesser magnitude than a single-family home 300 feet from the roost but 40 feet from the eagles' foraging area. The existing activities in examples (1) and (2) are of similar scope, while the existing activities in example (3) and (4) are not.

**Vegetative buffer** – An area surrounding a bald eagle nest that is wholly or largely covered by forest, vegetation, or other natural ecological characteristics, and separates the nest from human activities.

## **Charter Township**

TO:Zoning Board of AppealsFROM:Township Planner

**NEW BUSINESS** 

# SUBJECT: B) (Not Ready for Review and Approval) SPR 2019-14 Sand and Gravel Pit located at S LINCOLN RD MOUNT PLEASANT, MI PID 14-033-30-006-00 48858-0000 Owner: JAMES ZALUD AND DANIEL ZALUD

JAINES ZALUD AND DANIEL ZALUD

Applicant: The Isabella Corporation

Owner: James Zalud and Daniel Zalud

Location: S LINCOLN RD. MOUNT PLEASANT MI 48858-0000

Current Zoning: AG

Adjacent Zoning: AG, AG-1 (Restrictive Agricultural Lincoln Twp)

**Future Land Use/Intent:** *Rural Preservation*: Rural Preservation Areas outside of the growth boundary should be maintained at a low intensity rural character of development that will not adversely impact natural features and agricultural uses. Agriculture should be promoted and future rezoning requests for residential should be prohibited to prevent leapfrog development. **Current Use:** Vacant

Reason for Request: Sand and Gravel Pit.

**<u>History</u>**: Applicant applied for same special use with site plan in January of 2018. The applicant withdrew the application ahead of the scheduled public hearing. (See attached withdrawal letter) At this time I do not have outside agency approvals from the ICRC, ICTC, or Township Utilities. I do not have storm water management approval but it is likely this project will not need it. Sidewalks are not shown on the plan and no relief from construction has been requested.

**Objective of board:** Review sections 12 and 30.4.S of the Zoning Ordinance. The Planning Commission shall study the site plan and shall, within sixty days of its submittal to the Zoning Official, either approve or disapprove the proposed site plan. If the site plan is disapproved, the reasons for disapproval shall be stated. Upon approval of a site plan, at least two copies of the site plan as finally approved shall be signed and dated by the Secretary of the Planning Commission.

#### **Recommendation from Township Planner**

At this time, I would NOT review SPR 2019-14 as it is not ready for approval. You may use it as information when reviewing SUP 2019-07.

Twp Planner Peter Gallinat Peter Gallinat, Township Planner pgallinat@uniontownshipmi.com 2010 South Lincoln Mt. Pleasant, MI 48858 Phone 989-772-4600 Ext. 241 Fax 989-773-1988

····	
<u> </u>	
	· · · · · · · · · · · · · · · · · · ·

I submit the site plan and this application as a true representation of existing and proposed conditions. I agree to install all features as shown and to abide by conditions placed upon approval of this plan by the Union Township Planning Commission . False or inaccurate information placed upon this plan may be cause for revocation of any permits issued pursuant to site plan approval and / or removal of work installed. Any changes to the Site Plan now or in the future must be approved by the Union Township Planning Commission or Zoning Administrator. Approval of this plan shall not constitute the right to violate any provisions of the Union Township Zoning Ordinance 1991-5, or other applicable building or state codes and or laws.

### PERMIT INFORMATION

#### www.michigan.gov/deqpermits

The Department of Environmental Quality (DEQ) has prepared a list of key questions to help Identify what DEQ permits, licenses, or approvals of a permit-like nature may be needed. By contacting the appropriate offices indicated, you will help reduce the possibility that your project or activity will be delayed due to the untimely discovery of additional permitting requirements later in the construction process. While this list covers the existence of permits and approvals required from the DEQ, it is not a comprehensive list of all legal responsibilities. A useful way to learn whether other requirements will apply is to go through the Setf-Environmental Assessment in the Michigan Guide to Environmental, Health, and Safety Regulations, online at: <a href="http://www.michigan.gov/ehsguide">http://www.michigan.gov/ehsguide</a>. Please call the Environmental Assistance Center at 800-662-9278 to talk with any of the DEQ programs noted below.

KEY QUESTIONS:	Yes	Nö	PROGRAM WEBPAGE AND CONTACTS
MISCELLANEOUS CONSTRUCTION			
Air Quality Permit to Install: Will your business involve the installation or construction of any process equipment that has the potential to emit air contaminants (e.g. dry sand blasting, boilers, standby generators)?	Y	N X	Air Quality Division (AQD), Permit Section
Asbestos Notification: Does the project involve renovating or demolishing all or portions of a building? Notification is required for asbestos removal and required for all demolitions even if the structure never contained asbestos.	Ŷ	N X	AQD, <u>Asbestos Program</u>
Land and Water Featured Programs (Water Resources Division) - USACE Consolidated Permits: Please consult the Land and Water Management Decision Tree document to evaluate whether your project needs a land and water management permit (i.e., Does the project involve filling, dredging, placement of structures, draining, or use of a wetland?).	Y	N	Water Resources Division (WRD), Joint Permit Application
Soil Erosion and Sedimentation Control: Does the project involve an earth change activity (including land balancing, demolition involving soil movement, and construction)?	Y X	N	Soil Erosion and Construction Storm Water, or Contact your Local Agency
NPDES Storm Water Discharge from Construction Sites Notice of Coverage: Does the project involve construction which will disturb one or more acres that come into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	Y	N	NPDES <u>Storm Water Permits Program</u> , or appropriate <u>DEQ District Office</u>
Public Swimming Pool Construction (Spas/Hot Tubs) Permits: Will your business involve the construction or modification of a public swimming pool, spa or hot tub?	Y	N	Public Swimming Pool Program, or appropriate DEQ District Office
Threatened and Endangered Species: Does the project involve activities that would destroy a protected species of plant or animal or disturb a protected animal species?	Y	N X	Endangered Species Assessment, Threatened and Endangered Species Program, 517-373-1552
Does the project involve construction or alteration of any sewage collection or treatment facility?	Y	N	Appropriate <u>District Office</u> , WRD, Part 41 Construction Permit Program
Does the project involve construction of a facility that landfills, transfers, or processes of any type of solid non-hazardous waste on-site, or places industrial residuals/sludge into or onto the ground?	Y	N	Office of Waste Management and Radiological Protection (OWMRP), <u>Solid</u> <u>Waste</u> , Appropriate <u>DEQ District Office</u>
Does the project involve the construction of an on-site treatment, storage, or disposal facility for hazardous waste?	Ľ	N	OWMRP, Hazardous Waste Section, Treatment, Storage and Disposal
WATER SUPPLY (More information, see: http://www.michigan.gov/degw	vater,	sele	ct "drinking water")
t am buying water from my community water supply (i.e. city of Detroit or Grand Rapids)	Y	N	Contact your Local Water Utility
I have a private or other water supply well (Type III)	Ľ	N	Contact your (District or County) Local Health Department
I have a Non-Community Water Supply (Type II)	Y	N	Guide, Contact your (District or County) Local Health Department
I am a community water supply (Type I)	Y	N	Community Water Supply, DEQ District Office Community Water Supply Program

Page 1 of 4

WASTEWATER MANAGEMENT	: 22		
Storm Water Discharge to Wetlands: Will storm water be collected, stored, or treated in a wetland area from a public road, industrial, commercial, or multi-unit residential development?	Y	N X	WRD, Joint Permit Application
Great Lakes: Does the project involve construction, filling, or dredging below the Ordinary High Water Mark of one of the Great Lakes?	Y	N X	WRD, Joint Permit Application
inland Lakes and Streams: Does the project involve any dredging, filling, placement of structures, or the operation of a marina within an inland waterbody (e.g. lake, river, stream, drain, creek, ditch, or canal), enlargement of a waterbody, or excavation of a pond within 500 feet of a waterbody?	Y D	N	WRD, Joint Permit Application
Storm Water Ponds and Discharges to Inland Lakes/Streams, or Great Lakes: Will storm water from any road or any other part of the development be discharged either directly or ultimately to an inland waterbody, or one of the Great Lakes; or will a storm water pond be constructed within 500 feet of an inland waterbody?	Υ	Z	WRD, Joint Permit Application
Does the project involve placement of fill, earth moving, or placement of structures within the 100-year <i>floodplain</i> of a watercourse?	Y	Z	WRD, Joint Permit Application
Does the project involve construction of a building or septic system in a designated Great Lakes high risk erosion area?	Y	NX	WRD, Shoreland Management
Does the project involve dredging, filling, grading, or other alteration of the soil, vegetation, or natural drainage, or placement of permanent structures in a designated <i>environmental area</i> ?	Ŷ	N	WRD, Shoreland Management
Does the project propose any development, construction, silvicultural activities or contour alterations within a designated <i>critical dune area</i> ?	Y	N	WRD, Sand Dune Management
Does the project involve construction of a <i>dam</i> , weir or other structure to impound flow?		N	WRD, <u>Dam Safety</u> Program
CONSTRUCTION PERMITS (SECTOR SPECIFIC)			
Does the project involve the construction or alteration of a water supply system or sewage disposal system for a manufactured housing project?	Y	N X	Office of Drinking Water & Municipal Assistance (ODWMA)
Does the project involve a subdivision or site condominium project utilizing individual on-site subsurface disposal systems or individual wells?	Y	N	<u>ODWMA</u>
Does the project involve the construction or modification of a campground?	Ŷ	N X	ODWMA, <u>Campgrounds program</u>
Does the project involve the construction or modification of a public swimming pool?	Y	N	ODWMA, Swimming pools program
OPERATIONAL PERMITS			
Renewable Operating Permit. Does your facility have the potential to emit any of the following: 100 tons per year or more of any criteria pollutant; 10 tons per year or more of any hazardous air pollutant; or 25 tons per year or more of any combination of hazardous air pollutants?	Y	R	AQD, Permit Section
NPDES: Does the project involve the discharge of any type of wastewater to a storm sewer, drain, lake, stream, or other surface water?	Y	N	WRD, Appropriate <u>DEQ District Office</u> , or <u>National Pollutant Discharge Elimination</u> (NPDES) Permit Program
Does the facility have industrial activity that comes into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	Ŷ	N	WRD, <u>Permits Section</u> , or appropriate <u>DEQ</u> <u>District Office</u>
Does the project involve the <b>discharge of wastewaters</b> into or onto the <b>ground</b> (e.g. subsurface disposal or irrigation)?	Υ	N	WRD, <u>Groundwater Permits Program</u>
Does the project involve the drilling or deepening of wells for waste disposal?	Y	N	Office of Oil, Gas and Minerals (OOGM)
Does the project involve landfilling, transferring, or processing of any type of solid non-hazardous waste on-site, or placing industrial residuals/sludge into or onto the ground?	Č	NX	OWMRP or Appropriate DEQ District Office

Does the project involve the on-site treatment, storage, or disposal of hazardous waste?	Y D	Z×⊠	OWMRP, Hazardous and Liquid Waste
Does the project require a site identification number (EPA number) for regulated waste activities (used oil, liquid waste, hazardous waste, universal waste, PCBs)? (Web_Site)	Y	N	OWMRP, Appropriate DEQ District Office
Does the project involve the receipt, possession, manufacture, use, storage, transport, transfer, release, or disposal of radioactive material in any form?	Y	N X	OWMRP, <u>Radioactive Material and</u> Standards Unit
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have radioactive levels above background?	Y	N	OWMRP <u>Radioactive Material and</u> Standards Unit
Do you desire to develop a withdrawal of over 2,000,000 gallons of water per day from any source other than the Great Lakes and their connecting waterways? Or, do you desire to develop a withdrawal of over 5,000,000 gallons of water per day from the Great Lakes or their connecting waterways?	Y D	Z	WRD, DWEHS, <u>Source Water Protection</u> <u>Unit</u>
CHEMICAL ADDITION PROJECTS			
Are you using chemicals or materials in, or in contact with, drinking water at any point in the water works system?	Y □	N	WRD, Appropriate <u>DEQ District Office</u> , <u>Public Water Supply Program</u>
Are you applying a chemical treatment for the purpose of aquatic nuisance control (pesticide/herbicide etc) in a water body (i.e. lake, pond or river)? (5.	Y	N X	WRD, <u>Aquatic Nuisance Control</u> and Remedial Action Unit
Are you applying materials to a water body for a water resource management project (i.e. mosquito control treatments, dye testing, or fish reclamation projects)?	Y	N	WRD, Surface Water Assessment Section
OPERATIONAL PERMITS (SECTOR SPECIFIC)			
Does the project involve the transport of some other facility's non-hazardous liquid waste?	Y	N	OWMRP, Transporter Program
Does the project involve the transport hazardous waste?	Ŷ	N	OWMRP, Transporter Program
Does your facility have an electric generating unit that sells electricity to the grid and burns a fossil fuel?	Y	N X	AQD, <u>Acid Rain Permit Program</u>
Is the project a dry cleaning establishment utilizing perchloroethylene or a flammable solvent in the cleaning process?	Y	N	DEQ, AQD, <u>Dry Cleaning Program</u>
Does your laboratory test potable water as required for compliance and monitoring purposes of the Safe Drinking Water Act?	Y	N	DEQ, Laboratory Services Certifications
Does the project involve the generation of medical waste or a facility that treats medical waste prior to its disposal?	Y	N	OWMRP, Medical Waste Regulatory Program
Does the project involve transport of septic tank, cesspool, or dry well contents or the discharge of septage or sewage sludge into or onto the ground?	Ŷ	N	ODWMA, <u>Septage Program</u>
Do you store, haul, shred or process scrap tires?	Y	N	OWMRP, <u>Scrap Tire Program</u>
Does the project involve the operation of a public swimming pool?	Y	N	ODWMA, Public Swimming Pools Program
Does the project involve the operation of a campground?	Y	N	ODWMA, <u>Campgrounds</u>
Do you engage in the business of hauling bulk water for drinking or household purposes (except for your own household use)?	ř	N	ODWMA, Water Hauler Information
PERSONAL LICENSES/CERTIFICATIONS			
Are you designated by your facility to be the Certified Operator to fulfill the requirements of a wastewater discharge permit (NPDES including Storm	Ň	N	WRD, <u>Operator Training, Storm Water</u> Program

.

Water or Groundwater)?			
Are you a drinking water operator in charge of a water treatment or water distribution system, back-up operator, or shift operator?	Y	N	WRD, Operator Training
Are you a water-well drilling contractor, pump installer, dewatering well contractor or dewatering well pump installer?	Y	N	WRD, Well Construction Unit
OIL, GAS AND MINERALS			
Do you want to operate a central production facility (applies to oil and gas production facilities where products of diverse ownership are commingled)?	Y	N	OOGM, <u>Petroleum Geology and Production</u> <u>Unit</u>
Does the project involve the removal of sand from a sand dune area within two (2) miles of a Great Lakes shoreline?	۲	N	OOGM, Minerals and Mapping Unit, <u>Sand</u> Dune Mining Program
Does the project involve the diversion and control of water for the mining and processing of low-grade iron ore?	Ý	N	COGM, Minerals and Mapping
Does the project involve the surface or open-pit mining of metallic mineral deposits?	Y	N	OOGM, Minerals and Mapping
Does the project involve the mining of nonferrous mineral deposits at the surface or in underground mines?	Y	N	OOGM, Minerals and Mapping
Does the project involve mining coal?	Y	N	OOGM, Minerals and Mapping
Do you want to change the status of an oil or gas well (i.e. plug the well)?	Y	N	OOGM, Permits and Bonding Unit
Does the project involve drilling of oil, gas, brine disposal, secondary recovery, or hydrocarbon storage wells?	Y	N	OOGM, Permits and Bonding Unit
Does the project involve plugging or deepening of an oil or gas well, or conveying rights in the well as an owner to another person?	Y	N	OOGM, Permits and Bonding Unit
Does the project involve changing the status or plugging of a mineral well?	Y	N	OOGM, Minerals and Mapping
Does the project involve the drilling or deepening of wells for brine production, solution mining, storage, or as test wells?	Y	N X	OOGM, Minerals and Mapping
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have radioactive levels above background?	Y	N	OWMRP, Radioactive Protection Programs
STORAGE TANKS (CONSTRUCTION AND OPERATION)			
Does the project involve the installation of an aboveground storage tank for a flammable or combustible liquid (under 200 degrees Fahrenheit)?	Y	N X	Michigan Department of Licensing and Regulatory Affairs (DLARA) - <u>Storage Tank</u> Unit, 517-335-7211
Does the project involve the installation of a compressed natural gas dispensing station with storage?	Y	N	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the installation of a <b>liquefied petroleum gas</b> container filling location or storage location that has a tank with a capacity of more than 2,000 gallons or has two (2) or more tanks with an aggregate capacity of more than 4,000 gallons?	Ň	N	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the installation, removal, or upgrade of an underground storage tank containing a petroleum product or a hazardous substance?	Y	N X	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the Installation of a hydrogen system?	Ŷ	N	DLARA - Storage Tank Unit, 517-335-7211

## Mount Pleasant Fire Department 804 E. High Street Mount Pleasant, Mi 48858

Union Township Site Plan Review

Thursday December 5, 2019

Gravel Pit-Lincoln and Milbrook 5000blk S Lincoln RD Mt. Pleasant, MI 48858

A Site Plan Review was conducted on Thursday December 5, 2019 and revealed the following requirements listed below.

ORDER TO COMPLY: Since these conditions are contrary to code, you must correct them upon receipt of this notice. Please provide our department the documentation that verifies compliance with the code.

This list shall not be considered all-inclusive, as other requirements may be neccessary, additional requirements are located in Chapter 5 and appendixes B, C, and D of the 2012 Edition of the International Fire Code.

If you have any questions regarding this matter, please feel free to contact me at (989) 779-5122.

#### Violation Code

1 PROPERTY Identification

Gravel/Sand Pit

S. Lincoln Rd and Millbrook Rd.

ACCESS ROAD LOAD Designed and Maintained to Support the

All fire apparatus access roads shall be designed and maintained to support the imposed loads of fire apparatus and shall be surfaced so as to provide allweather driving capabilities in accordance with Chapter 5, Sections 503.2.3 and 503.4 of the 2012 Edition of the International Fire Code.

DIMENSIONS Road Width Without Hydrants

Fire apparatus access roads shall have an unobstructed width of not less than 20 feet, exclusive of shoulders, except for approved security gates in accordance with Section 503.6, and an unobstructed vertical clearance of not less than 13 feet 6 inches.

Site plan meets requirements.

Keeler, Randy Lieutenant Mount Pleasant Fire Department Peter Gallinat Township Planner Charter Twp of Union 2010 S. Lincoln Rd. Mt Pleasant, MI 48858 989-772-4600 x 241 pgallinat@uniontownshipmi.com

<jzalud@isabellacorporation.com>
Subject: RE: Zalud Sand Pit

Peter,

I have reviewed the above site plan.

Driveway permit will be required, also a road use agreement was discussed in regards to dust control along Millbrook and Lincoln Road depending upon the route trucks are using going to and from the proposed site.

Patrick J. Gaffney, PE Engineer Superintendent Isabella CRC 989-773-7131 x115 989-772-2371 fax pgaffney@isabellaroads.com

Peter Gallinat, Township Planner pgallinat@uniontownshipmi.com 2010 South Lincoln Mt. Pleasant, MI 48858 Phone 989-772-4600 Ext. 241 Fax 989-773-1988

Meeting 12/17/19

TO: FROM: Planning Commission Township Planner

### NEW BUSINESS

# SUBJECT: C) SPR 2019-15 Self-Storage buildings located at S PARK PLACE MOUNT PLEASANT, MI 48858 PID 14-011-30-001-14. Owner: MT PLEASANT STORAGE CENTRAL LLC

Jnion

Applicant: Alan Johns

Owner: MT. PLEASANT STORAGE CENTRAL LLC

Location: S PARK PLACE. MOUNT PLEASANT MI 48858

Current Zoning: B-4

Adjacent Zoning: B-4, I-1, SD-1 (Industrial MP City)

**Future Land Use/Intent:** *Industrial/Employment:* This category promotes traditional industrial employment. Located near regional nodes with convenient access to interchanges, this district provides an opportunity to diversify the industrial employment base of the township by reserving areas for research, development, technology, and corporate offices or campuses that will have less of an impact than traditional industrial uses. Uses to complement CMU's Smart Zone would include research, design, engineering, testing, laboratories, diagnostics, and experimental product development. Types of industries may include automotive, electronics, alternative energy technologies, computers, communications, information technology, chemical or biomedical engineering.

Current Use: Vacant.

Reason for Request: Construct 7 self-storage buildings.

**<u>History</u>:** A special use permit (SUP 2019-05) was approved for self-storage buildings in September of this year on the condition that a site plan was approved. As discussed during the SUP application the applicant who owns the I-1 parcel to the south with existing self-storage buildings plans to combine both parcels into one parcel with split zoning. At this time the project has received all outside agency approvals. MPFD, ICRC, ICTC, Isabella County Drain Office for Stormwater Management and Union Township Utilities.

**Objective of board:** Review sections 12 and 30.4.U of the Zoning Ordinance. The Planning Commission shall study the site plan and shall, within sixty days of its submittal to the Zoning Official, either approve or disapprove the proposed site plan. If the site plan is disapproved, the reasons for disapproval shall be stated. Upon approval of a site plan, at least two copies of the site plan as finally approved shall be signed and dated by the Secretary of the Planning Commission.

### Recommendation from Township Planner

At this time, I would approve SPR 2019-15 on the condition of photometric lighting plan submitted and approved at time of building permit. Twp Planner Peter Gallinat

Provide Construction Type (per Mi Building Code) and if sprinkled, (assume Type IVb, un-sprinkled if not provided)

#### APPLICANT COMMENTS

I submit the site plan and this application as a true representation of existing and proposed conditions. I agree to install all features as shown and to abide by conditions placed upon approval of this plan by the Union Township Planning Commission . False or inaccurate information placed upon this plan may be cause for revocation of any permits issued pursuant to site plan approval and / or removal of work installed. Any changes to the Site Plan now or in the future must be approved by the Union Township Planning Commission or Zoning Administrator. Approval of this plan shall not constitute the right to violate any provisions of the Union Township Zoning Ordinance 1991-5, or other applicable building or state codes and or laws.

## SITE PLAN REVIEW HAZARDOUS SUBSTANCES REPORTING FORM

This form must be completed and submitted as part of the site plan for facilities which may use, store, or generate hazardous substances or polluting materials (including petroleum-based products)

Name of business:		Mt. Pleasant Storage, TEC Contral, LLC				
Name of busin	ess owner(s):					
		Alan Johns				
Street and m	ailing address:	1414 W. High Street				
		Mt. Pleasant, MI 48858				
Telephone:	(989) 77	5-5050				
Fax:	(989) 77	2-6151				
Email:	ajohns@apprai	saladvisorygroup.com				

I affirm that the information submitted is accurate.

Owner(s) signature and date:

18

Information compiled by:

#### Part 1: Management of Hazardous Substances and Polluting Materials

- 1. YN Will the proposed facility store, use or generate hazardous substances or polluting materials (including petroleum-based products) now or in the future? If yes, please complete this form and submit with your site plan. A catalogue and map of natural resources on and near the site, including an assessment of groundwater vulnerability is required to be submitted with your plan.
- 2. YN on-site?

site?

- 4. YN Will the new underground storage tanks be located less than 2000 feet from a drinking water well serving more than a single household?
- 5. VN Are existing underground storage tanks on-site less than 200 feet from a drinking water well serving more than a single household?

If the answer to questions 4 or 5 are yes, you may be in violation of the State of Michigan underground storage tank regulations. For specific requirements, please contact the MDEQ Underground Storage Tank Division. District Office Telephone: 989-894-6200 (Saginaw Bay District Office)

- Will the interior of the facility have general purpose floor drains? (general purpose floor drains should not be connected to a sanitary sewer system, stormwater drainage system, dry well or septic system). If yes, will the floor drain connect to: (circle one)
  - a. on-site holding tank
  - b. on-site system

The on-site system must be approved by the MDEQ. Contact: MDEQ Waste Management Division. District Office telephone: 989-894-6200 (Saginaw Bay District Office)

7. Y(N) Will hazardous substances or polluting materials be stored, used, or handled outof doors near storm drains which discharge to lakes, streams, or wetlands? If yes, describe the type of catch basin or spill containment facilities which will be used (use an attached sheet with diagram if appropriate).

cc: Charter Township of Union Department of Public Works

Please list the hazardous substances and polluting materials (including chemicals, hazardous materials, petroleum products, h azardous wastes and other polluting materials) which are expected to be used, stored or generated on -site. Quantities should reflect the maximum volumes on hand at any time. Attach additional pages if necessary to list all hazardous substances and polluting materials.

## **PERMIT INFORMATION**

#### www.michigan.gov/deqpermits

The Department of Environmental Quality (DEQ) has prepared a list of key questions to help Identify what DEQ permits, licenses, or approvals of a permit-like nature may be needed. By contacting the appropriate offices indicated, you will help reduce the possibility that your project or activity will be delayed due to the untimely discovery of additional permitting requirements later in the construction process. While this list covers the existence of permits and approvals required from the DEQ, it is not a comprehensive list of all legal responsibilities. A useful way to learn whether other requirements will apply is to go through the Setf-Environmental Assessment in the Michigan Guide to Environmental, Health, and Safety Regulations, online at: <a href="http://www.michigan.gov/ehsguide">http://www.michigan.gov/ehsguide</a>. Please call the Environmental Assessment as 800-662-9278 to talk with any of the DEQ programs noted below.

KEY QUESTIONS:	Yes		PROGRAM/WEBPAGE AND/CONTACT
MISCELLANEOUS CONSTRUCTION			
Air Quality Permit to Install: Will your business involve the installation or construction of any process equipment that has the potential to emit air contaminants (e.g. dry sand blasting, boilers, standby generators)?	ľ	N	Air Quality Division (AQD), Permit Section
Asbestos Notification: Does the project involve renovating or demolishing all or portions of a building? Notification is required for asbestos removal and required for all demolitions even if the structure never contained asbestos.	Ľ	N	AQD, <u>Asbestos Program</u>
Land and Water Featured Programs (Water Resources Division) - USACE Consolidated Permits: Please consult the Land and Water Management Decision Tree document to evaluate whether your project needs a land and water management permit (i.e., Does the project involve filling, dredging, placement of structures, draining, or use of a wetland?).	Ŷ	N	Water Resources Division (WRD), Joint Permit Application
Soil Erosion and Sedimentation Control: Does the project involve an earth change activity (including land balancing, demolition involving soil movement, and construction)?	Y	N	Soil Erosion and Construction Storm Wate or Contact your Local Agency
NPDES Storm Water Discharge from Construction Siles Notice of Coverage: Does the project involve construction which will disturb one or more acres that come into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	à	N	NPDES Storm Water Permits Program, or appropriate DEQ District Office
Public Swimming Pool Construction (Spas/Hot Tubs) Permits: Will your business involve the construction or modification of a public swimming pool, spa or hot lub?	ř	N	Public Swimming Pool Program, or appropriate <u>DEQ District Office</u>
Threatened and Endangered Species: Does the project involve activities that would destroy a protected species of plant or animal or disturb a protected animal species?	Ŷ	N	Endangered Species Assessment, <u>Threatened and Endangered Species</u> Program, 517-373-1552
Does the project involve <i>construction</i> or alteration of any sewage collection or realment facility?	Ľ	N	Appropriate <u>District Office</u> , WRD, Part 41 Construction Permit Program
Does the project involve construction of a facility that landfills, transfers, or processes of any type of <i>solid non-hazardous waste</i> on-site, or places industrial residuals/sludge into or onto the ground?	Ŷ	N	Office of Waste Management and Radiological Protection (OWMRP), <u>Solid</u> <u>Waste</u> , Appropriate <u>DEQ District Office</u>
Does the project involve the construction of an on-site treatment, storage, or disposal facility for hazardous waste?	Ľ	N X	OWMRP, Hazardous Waste Section, Treatment, Storage and Disposal
VATER SUPPLY (More information, see: http://www.michigan.gov/degw	ater,	sele	ct "drinking water")
am buying water from my community water supply (i.e. city of Detroit or Grand Rapids)	Ľ	N	Contact your Local Water Utility
have a private or other water supply well (Type III)	Ŷ	Z	Contact your (District or County) Local Health Department
have a Non-Community Water Supply (Type II)	Y	N	Guide, Contact your (District or County) Local Health Department
am a community water supply (Type I)	Y	N	Community Water Supply, DEQ District Office Community Water Supply Program

WASTEWATER MANAGEMENT	( Mith	5/7.40	
Storm Water Discharge to Wetlands: Will storm water be collected, stored, or treated in a wetland area from a public road, industrial, commercial, or multi- unit residential development?	Ľ	N	WRD, Joint Permit Application
<u>Great Lakes</u> : Does the project involve construction, filling, or dredging below the Ordinary High Water Mark of one of the Great Lakes?	ř	N	WRD, Joint Permit Application
<u>Inland Lakes and Streams</u> : Does the project involve any dredging, filling, placement of structures, or the operation of a marina within an inland waterbody (e.g. lake, river, stream, drain, creek, ditch, or canal), enlargement of a waterbody, or excavation of a pond within 500 feet of a waterbody?	Y	N	WRD, Joint Permit Application
Storm Water Ponds and Discharges to Inland Lakes/Streams, or Great Lakes: Will storm water from any road or any other part of the development be discharged either directly or ultimately to an inland waterbody, or one of the Great Lakes; or will a storm water pond be constructed within 500 feet of an inland waterbody?	č	N	WRD, Joint Permit Application
Does the project involve placement of fill, earth moving, or placement of structures within the 100-year <i>floodplain</i> of a watercourse?	Ľ	N	WRD, Joint Permit Application
Does the project involve construction of a building or septic system in a designated Great Lakes high risk erosion area?	Ľ	N	WRD, Shoreland Management
Does the project involve dredging, filling, grading, or other alteration of the soil, vegetation, or natural drainage, or placement of permanent structures in a designated <i>environmental area</i> ?	Ŷ	N	WRD, Shoreland Management
Does the project propose any development, construction, silvicultural activities or contour alterations within a designated <i>critical dune area</i> ?	Ľ	N X	WRD, Sand Dune Management
Does the project involve construction of a <i>dam</i> , weir or other structure to impound flow?	Ľ	N X	WRD, <u>Dam Safety</u> Program
CONSTRUCTION PERMITS (SECTOR SPECIFIC)	-		
Does the project involve the construction or alteration of a water supply system or sewage disposal system for a manufactured housing project?	Ŷ	N X	Office of Drinking Water & Municipal Assistance (ODWMA)
Does the project involve a subdivision or site condominium project utilizing individual on-site subsurface disposal systems or individual wells?	Ľ	N	<u>ODWMA</u>
Does the project involve the construction or modification of a campground?	Ŷ	N	ODWMA, <u>Camparounds program</u>
Does the project involve the construction or modification of a public swimming pool?	Y	N	ODWMA, <u>Swimming pools program</u>
OPERATIONAL PERMITS			
Renewable Operating Permit: Does your facility have the potential to emit any of the following: 100 tons per year or more of any criteria pollutant; 10 tons per year or more of any hazardous air pollutant; or 25 tons per year or more of any combination of hazardous air pollutants?	Ŷ	ßz	AQD, Permit Section
NPDES: Does the project involve the discharge of any type of wastewater to a storm sewer, drain, lake, stream, or other surface water?	Ŷ	N X	WRD, Appropriate <u>DEQ District Office</u> , or <u>National Pollutant Discharge Elimination</u> (NPDES) Permit Program
Does the facility have industrial activity that comes into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	Y D	N X	WRD, <u>Permits Section</u> , or appropriate <u>DEQ</u> <u>District Office</u>
Does the project involve the discharge of wastewaters into or onto the ground (e.g. subsurface disposal or irrigation)?	Y	N Ø	WRD, Groundwater Permits Program
Does the project involve the drilling or deepening of wells for waste disposal?	ř	N	Office of Qil, Gas and Minerals (OOGM)
Does the project involve landfilling, transferring, or processing of any type of solid non-hazardous waste on-site, or placing industrial residuals/sludge into or onto the ground?	Ď	N	OWMRP or Appropriate DEO District Office

Does the project involve the on-site treatment, storage, or disposal of hazardous waste?	Ľ	N	OWMRP, Hazardous and Liquid Waste		
Does the project require a site identification number (EPA number) for regulated waste activities (used oil, liquid waste, hazardous waste, universal waste, PCBs)? (Web Site)	ř	N	OWMRP, Appropriate DEQ District Office		
Does the project involve the receipt, possession, manufacture, use, storage, transport, transfer, release, or disposal of radioactive material in any form?	Ľ	N	OWMRP, <u>Radioactive Material and</u> Standards Unit		
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have radioactive levels above background?		N	OWMRP Radioactive Material and Standards Unit		
Do you desire to develop a withdrawal of over 2,000,000 gallons of water per day from any source other than the Great Lakes and their connecting waterways? Or, do you desire to develop a withdrawal of over 5,000,000 gallons of water per day from the Great Lakes or their connecting waterways?	ř	N	WRD, DWEHS, <u>Source Water Protection</u> Unit		
CHEMICAL ADDITION PROJECTS					
Are you using chemicals or materials in, or in contact with, drinking water at any point in the water works system?	ř	N X	WRD, Appropriate <u>DEQ District Office</u> , Public Water Supply Program		
Are you applying a chemical treatment for the purpose of aquatic nuisance control (pesticide/herbicide etc) in a water body (i.e. lake, pond or river)? (5.	Ľ	N	WRD, <u>Aquatic Nuisance Control</u> and Remedial Action Unit		
Are you applying materials to a water body for a water resource management project (i.e. mosquito control treatments, dye testing, or fish reclamation projects)?	Ľ	N	WRD, Surface Water Assessment Section		
OPERATIONAL PERMITS (SECTOR SPECIFIC)					
Does the project involve the transport of some other facility's non-hazardous liquid waste?	Ľ	N	OWMRP, Transporter Program		
Does the project involve the transport hazardous waste?	Ľ	N	OWMRP, Transporter Program		
Does your facility have an electric generating unit that sells electricity to the grid and burns a fossil fuel?	Ľ	N	AQD, Acid Rain Permit Program		
Is the project a dry cleaning establishment utilizing perchloroethylene or a flammable solvent in the cleaning process?	ř	N	DEQ, AQD, Dry Cleaning Program		
Does your laboratory test potable water as required for compliance and monitoring purposes of the Safe Drinking Water Act?	Ľ	N	DEQ, Laboratory Services Certifications		
Does the project involve the generation of medical waste or a facility that treats medical waste prior to its disposal?	ř	N	OWMRP, Medical Waste Regulatory Program		
Does the project involve transport of septic tank, cesspool, or dry well contents or the discharge of septage or sewage sludge into or onto the ground?	Ľ	N X	ODWMA, Septage Program		
Do you store, haul, shred or process scrap tires?	ř	N	OWMRP. Scrap Tire Program		
Does the project involve the operation of a public swimming pool?	ř	N	ODWMA, Public Swimming Pools Program		
Does the project involve the operation of a campground?	Ň	N	ODWMA, <u>Campgrounds</u>		
Do you engage in the business of hauling bulk water for drinking or household purposes (except for your own household use)?	Ŷ	N Ø	ODWMA, Water Hauler Information		
PERSONAL LICENSES/CERTIFICATIONS					
Are you designated by your facility to be the Certified Operator to fulfill the requirements of a wastewater discharge permit (NPDES including Storm	Y		WRD, <u>Operator Training, Storm Water</u> Program		

Water or Groundwater)?			
Are you a drinking water operator in charge of a water treatment or water distribution system, back-up operator, or shift operator?	ř	N	WRD, <u>Operator Training</u>
Are you a water-well drilling contractor, pump installer, dewatering well contractor or dewatering well pump installer?	Ľ	N	WRD, Well Construction Unit
OIL, GAS AND MINERALS	1. Contraction		
Do you want to operate a central production facility (applies to oil and gas production facilities where products of diverse ownership are commingled)?	Ľ	N	OOGM, Petroleum Geology and Production Unit
Does the project involve the removal of sand from a sand dune area within two (2) miles of a Great Lakes shoreline?	Y	N	OOGM, Minerals and Mapping Unit, <u>Sand</u> Dune Mining Program
Does the project involve the diversion and control of water for the mining and processing of low-grade iron ore?	Ľ	N	OOGM, Minerals and Mapping
Does the project involve the surface or open-pit mining of metallic mineral deposits?	ľ	N	OOGM, Minerals and Mapping
Does the project involve the mining of nonferrous mineral deposits at the surface or in underground mines?	Ŷ	N	OOGM, Minerals and Mapping
Does the project involve mining coal?	Ň	N	OOGM, Minerals and Mapping
Do you want to change the status of an oil or gas well (i.e. plug the well)?	ř	N	OOGM, Permits and Bonding Unit
Does the project involve drilling of oil, gas, brine disposal, secondary recovery, or hydrocarbon storage wells?	Y	N X	OOGM, Permits and Bonding Unit
Does the project involve plugging or deepening of an oll or gas well, or conveying rights in the well as an owner to another person?	Y	N	OOGM, Permits and Bonding Unit
Does the project involve changing the status or plugging of a mineral well?	Y	N	OOGM, Minerals and Mapping
Does the project involve the drilling or deepening of wells for brine production, solution mining, storage, or as test wells?	Y	N	OOGM, Minerals and Mapping
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have radioactive levels above background?	ř	N	OWMRP, Radioactive Protection Programs
STORAGE TANKS (CONSTRUCTION AND OPERATION)		Acres 1	
Does the project involve the installation of an aboveground storage tank for a flammable or combustible liquid (under 200 degrees Fahrenheit)?	Y	Z	Michigan Department of Licensing and Regulatory Affairs (DLARA) - <u>Storage Tank</u> Unit, 517-335-7211
Does the project involve the installation of a compressed natural gas dispensing station with storage?	۲	N Ø	DLARA - <u>Storage Tank Unit</u> 517-335-7211
Does the project involve the Installation of a liquefled petroleum gas container filling location or storage location that has a tank with a capacity of more than 2,000 gallons or has two (2) or more tanks with an aggregate capacity of more than 4,000 gallons?	Ŷ	NZ	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the installation, removal, or upgrade of an underground storage tank containing a petroleum product or a hazardous substance?	Y	N	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the installation of a hydrogen system?	Y D	N	DLARA - Storage Tank Unit, 517-335-7211

## **PROPERTY DESCRIPTIONS**

A parcel of land in the Northeast 1/4 of the Southwest 1/4 of Section 11, T14N, R4W, Union Township, Isabella County, Michigan described as: To fix the Point of Beginning, commence at the West 1/4 comer of Section 11; thence South 01°00'00" West, on the West line of said section, 1348.96 feet; thence South 87°54'00" East, on the South 1/8 line of said section, 1389.46 feet; thence North 00°42'00" East, parallel with and 66.00 feet, measured at right angles, East of the West 1/8 line of said section, 551.71 feet; thence South 87°54'00" East, parallel with said South 1/8 line, 300.00 feet to the Point of Beginning of this description; thence continuing South 87°54'00" East, 33.88 feet to a point on a 133.00 foot radius curve, said point being a point on the Southwesterly right of way of Park Place (so-called); thence Southeasterly on the arc of said curve 118.08 feet to the point of tangency, said arc being subtended by a chord bearing South 62°15'42" East, 114.24 feet to said point of tangency; thence South 87°54'00" East, parallel with said South 1/8 line, 53.04 feet; thence South 00°42'00" West, parallel with said West 1/8 line, 260.55 feet; thence North 87°54'00" West, parallel with said South 1/8 line, 188.71 feet; thence North 00°42'00" East, parallel with said West 1/8 line, 310.00 feet back to the Point of Beginning.

Parcel II: Part of the Northeast 1/4 of the Southwest 1/4 of Section 11, T14N, R4W, Union Township, Isabella County, Michigan described as beginning at a point which is South 01°00' West, 1348.96 feet along the West Section line and South 87°54' East, 1389.46 feet along the South, East-West 1/8 line and North 00°42' East, 241.71 feet parallel with the West, North-South 1/8 line from the West 1/4 corner of Section 11; thence North 00°42' East, 310.00 feet on a line which is parallel with and 66.0 feet East of the West line of said Northeast 1/4 of the Southwest 1/4; thence South 87°54' East, 300.00 feet; thence South 00°42' West, 310.00 feet; thence North 87°54' West, 300.00 feet to the Point of Beginning. Together with the use of the South 551.71 feet of the West 66.0 feet of the Northeast 1/4 of the Southwest 1/4 of Section 11, T14N, R4W, as an ingress and egress easement. Together with an ingress and egress easement 33.0 feet wide, lying 16.5 feet on each side of the following described centerline, beginning at a point which is South 01°00' West, 1348.96 feet and South 87°54' East, 1389.46 feet and North 00°42' East, 551.71 feet and South 87°54' East, 300.0 feet from the West 1/4 corner of Section 11, T14N, R4W, thence North 62°09'52" East, 34.85 feet to the Southwesterly right of way line of Park Place and the terminus of said easement.

### 14-011-30-001-14

Part of the Northeast 1/4 of the Southwest 1/4 of Section 11, T14N, R4W, Union Township, Isabella County, Michigan described as beginning at a point on the West, N-S 1/8 line, which is S 01 °00' W, 1348.96 feet along the West Section line and S 87°54' E, 1323.46 feet along the South, E-W 1/8 line and N 00°42' E, 551.71 feet along the West, N-S 1/8 line from the West 1/4 corner of Section 11; thence N 00°42' E, 265.85 feet along the West, N-S 1/8 line; thence S 87°10'57" E, 405.05 feet to the centerline of Park Place; thence S 00°42' W, 180.64 feet along said centerline; thence along said centerline on a curve to the left, having a radius of 100 feet on a chord bearing and distance of S 14°28' E, 52.33 feet; thence S 62°09'52" W, 60.07 feet; thence N 87°54' W, 366.0 feet to the point of beginning. Subject to the use of the Easterly 33.0 feet thereof as Park Place and subject to the use of the Westerly 66.00 feet thereof as an ingress-egress easement and subject to the use of 16.5 feet along the line bearing S 62°09'52" W, as an ingressegress easement. Also to include the 66 foot strip and the West 66 feet of the South 551.71 feet of the Northeast 1/4 of the Southwest 1/4 of Section 11, T14N, R4W

## BENCHMARKS

BM #1 FOUND CHISELED "X" ON SW. HYDRANT FLANGE BOLT (UPPER FLANGE). HYDRANT IS 96' NORTH OF NORTH PROPERTY LINE AND 27' WEST OF THE CENTERLINE OF PARK PLACE (NORTH SIDE OF GRAFX DRIVEWAY) ELEV. = 755.76'

### BM #2

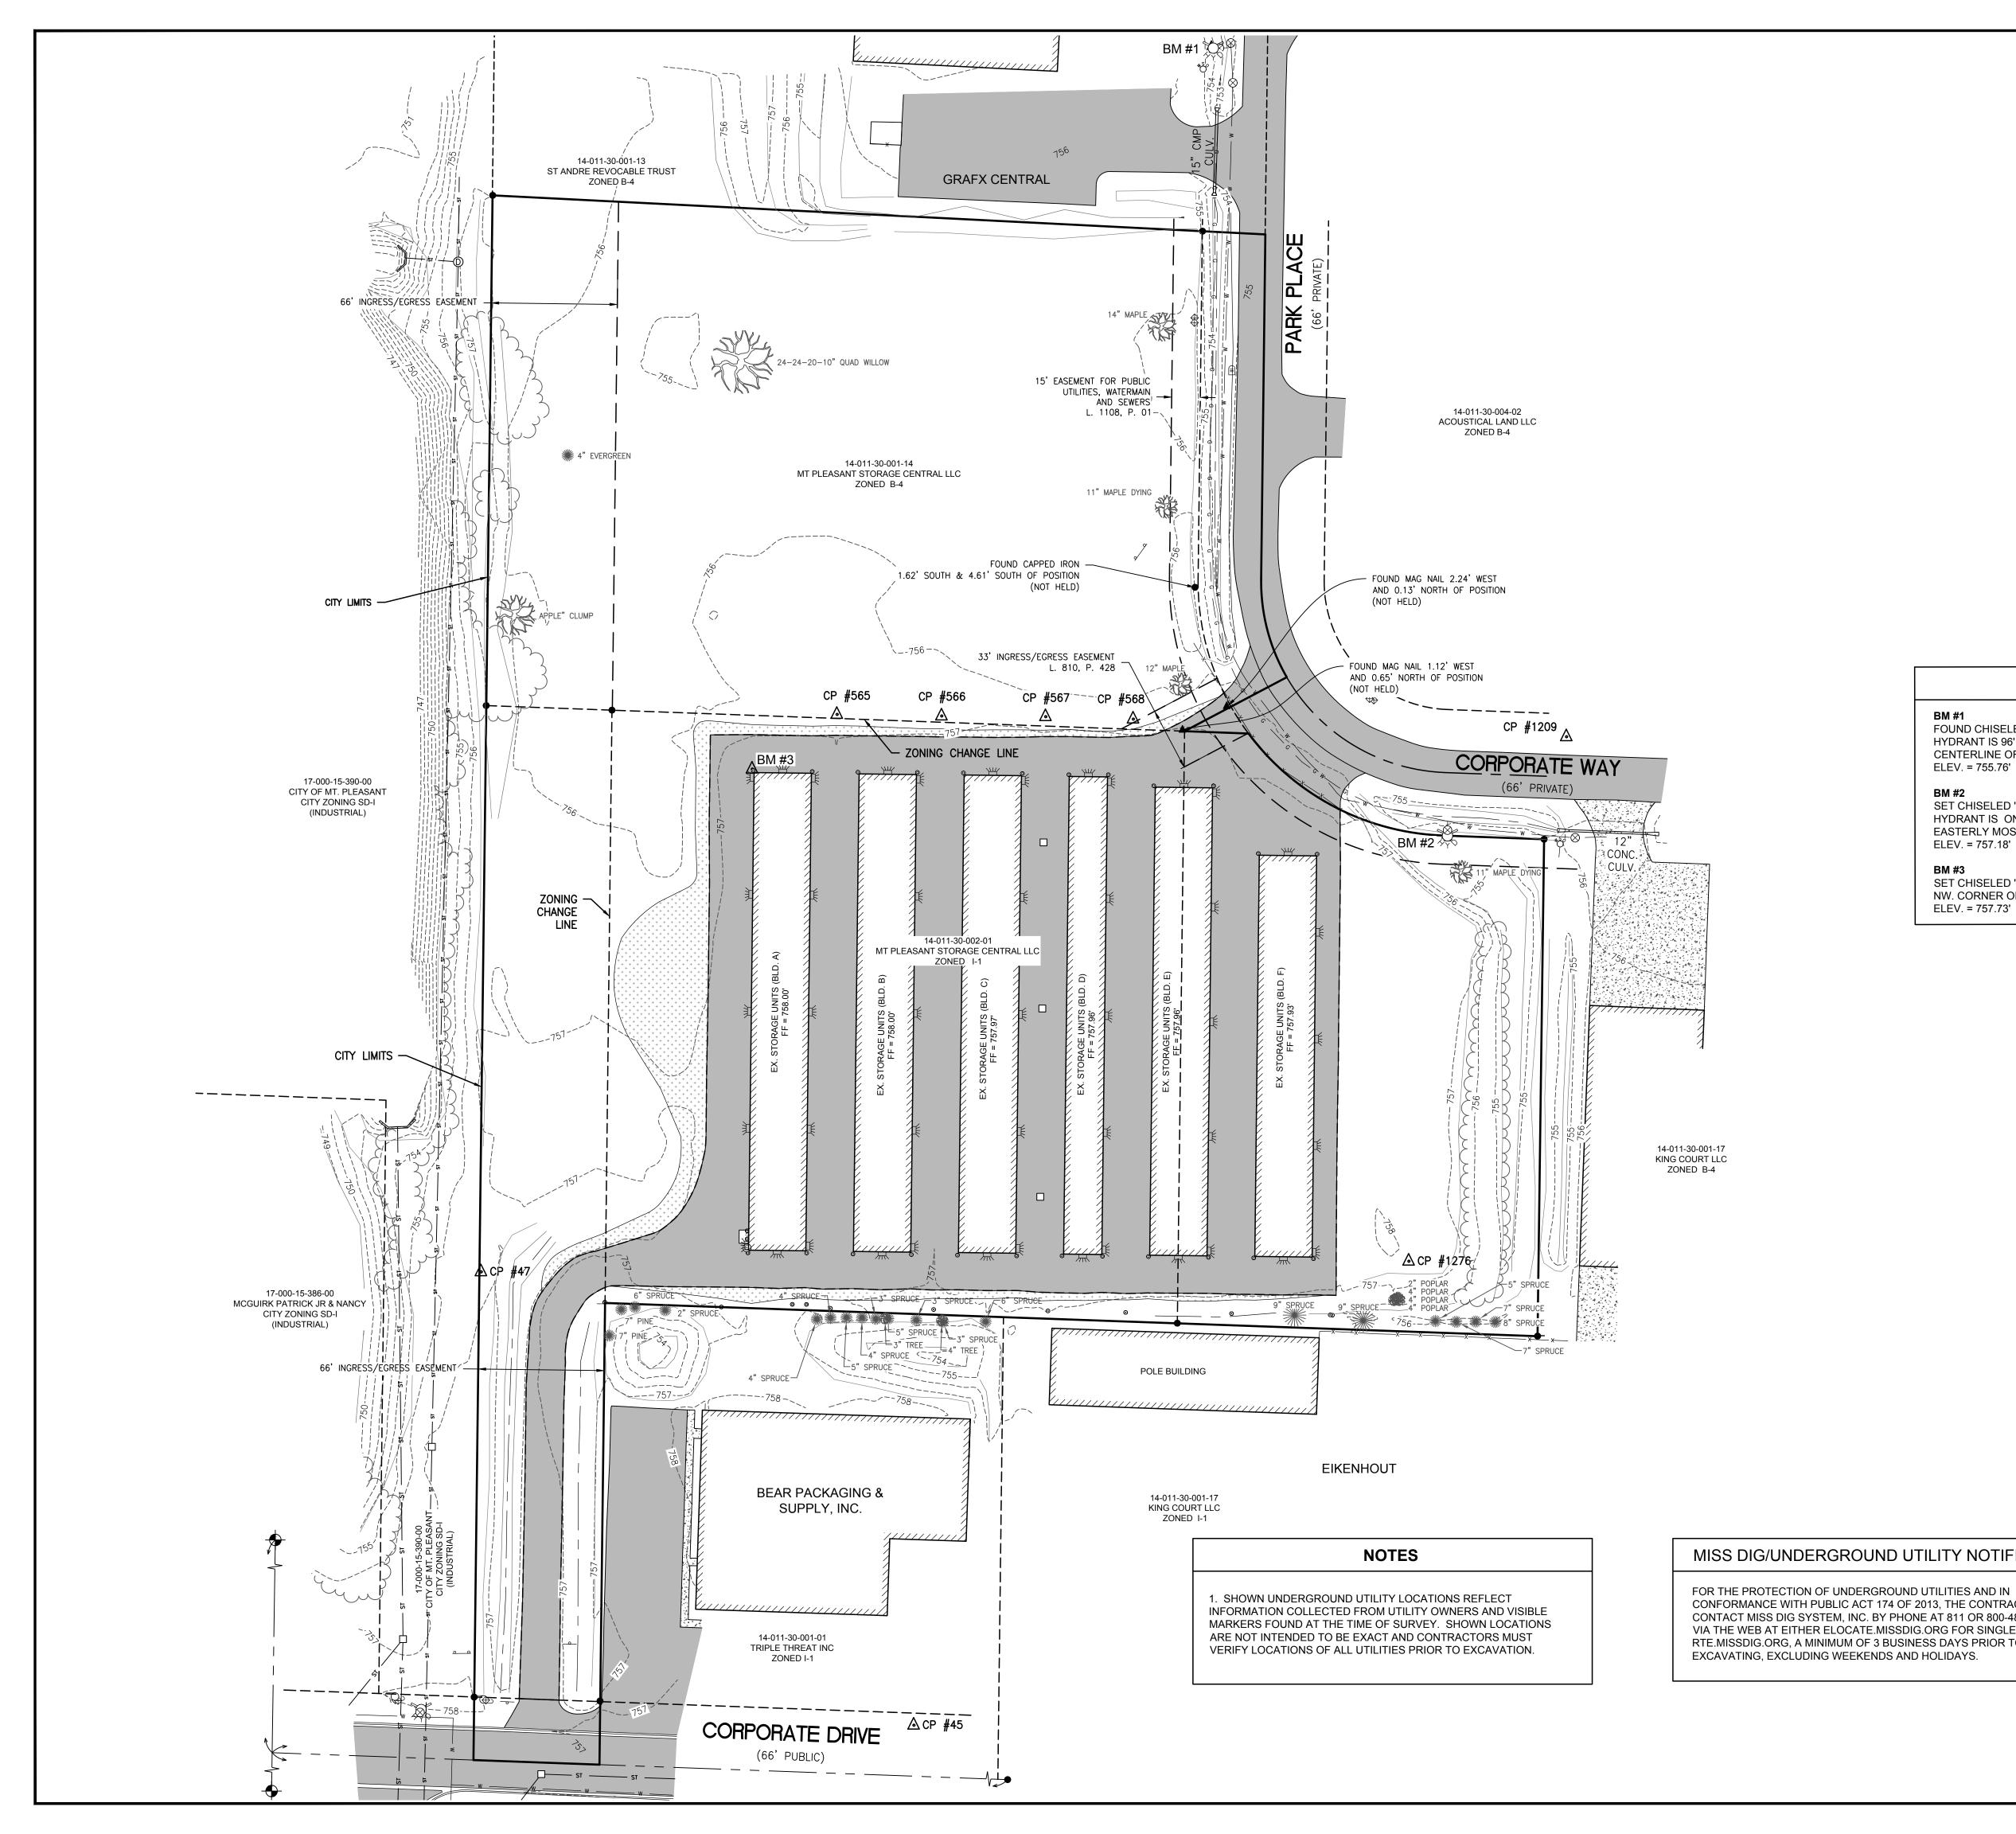

SET CHISELED "X" ON SW. HYDRANT FLANGE BOLT (UPPER FLANGE). HYDRANT IS ON THE SOUTH SIDE OF CORPORATE WAY 50' WEST OF THE EASTERLY MOST PROPERTY LINE ELEV. = 757.18'

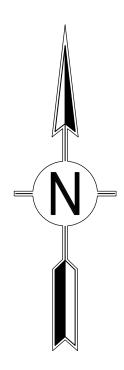

### BM #3

SET CHISELED "X" IN TOP OF CONCRETE FOUNDDATION FOR BOLLARD AT NW. CORNER OF WESTERLY MOST STORAGE UNIT BUILDING ELEV. = 757.73'

## BENCHMARKS

### BM #1

FOUND CHISELED "X" ON SW. HYDRANT FLANGE BOLT (UPPER FLANGE). HYDRANT IS 96' NORTH OF NORTH PROPERTY LINE AND 27' WEST OF THE CENTERLINE OF PARK PLACE (NORTH SIDE OF GRAFX DRIVEWAY) ELEV. = 755.76'

### BM #2

SET CHISELED "X" ON SW. HYDRANT FLANGE BOLT (UPPER FLANGE). HYDRANT IS ON THE SOUTH SIDE OF CORPORATE WAY 50' WEST OF THE EASTERLY MOST PROPERTY LINE ELEV. = 757.18'

### BM #3

SET CHISELED "X" IN TOP OF CONCRETE FOUNDATION FOR BOLLARD AT NW. CORNER OF WESTERLY MOST STORAGE UNIT BUILDING ELEV. = 757.73'

## MISS DIG/UNDERGROUND UTILITY NOTIFICATION

CONFORMANCE WITH PUBLIC ACT 174 OF 2013, THE CONTRACTOR SHALL CONTACT MISS DIG SYSTEM, INC. BY PHONE AT 811 OR 800-482-7171 OR VIA THE WEB AT EITHER ELOCATE.MISSDIG.ORG FOR SINGLE ADDRESS OR RTE.MISSDIG.ORG, A MINIMUM OF 3 BUSINESS DAYS PRIOR TO

- GENERAL NOTES
- 1. CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING TEMPORARY AND PERMANENT CONTROL MEASURES UNTIL VEGETATION HAS BEEN ESTABLISHED ON ALL DISTURBED AREAS. MAINTENANCE SHALL INCLUDE: PERIODIC INSPECTIONS, REMOVING ACCUMULATED SEDIMENT AND REPAIRING OR REPLACING DAMAGED CONTROL MEASURES. INSPECTIONS SHALL BE PERFORMED DAILY DURING THE CONSTRUCTION PROCESS. FOLLOWING CONSTRUCTION INSPECTIONS SHALL BE PERFORMED AT LEAST ON A WEEKLY BASIS AND AFTER EVERY SIGNIFICANT RAIN EVENT UNTIL VEGETATION HAS BEEN ESTABLISHED.
- 2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL OF TEMPORARY CONTROL MEASURES AFTER ALL DISTURBED AREAS HAVE BEEN RESTORED AND VEGETATION HAS BEEN ESTABLISHED. ALL CATCH BASINS WITHIN THE CONSTRUCTION INFLUENCE AREA SHALL BE PROTECTED UNTIL PERMANENT MEASURES HAVE TAKEN EFFECT. INLETS SHALL BE PROTECTED WITH GEOTEXTILE SILT SACKS. INSTALL SILT FENCES PRIOR TO ANY SITE WORK.
- AFTER THE ESTABLISHMENT OF VEGETATION ON DISTURBED AREAS. THE OWNER SHALL MAKE PERIODIC INSPECTIONS, AND REPLACE OR REPAIR DAMAGED PERMANENT CONTROL MEASURES
- 4. PERMANENT CONTROL MEASURES SHALL BE COMPLETED WITHIN 15 CALENDAR DAYS AFTER

# MICHIGAN UNIFIED KEYING SYSTEM

•	DETAIL	CHARACTERISTICS
	SEEDING	INEXPENSIVE AND VERY EFFECTIVE STABILIZES SOIL, THUS MINIMIZING EROSION PERMITS RUNOFF TO INFILTRATE SOIL, REDUCING RUNOFF VOLUME SHOULD INCLUDE PREPARED TOPSOIL BED
	RIPRAP, RUBBLE, GABIONS	USED WHERE VEGETATION IS NOT EASILY ESTABLISHED EFFECTIVE FOR HIGH VELOCITIES OR HIGH CONCENTRATIONS PERMITS RUNOFF TO INFILTRATE SOIL DISSIPATES ENERGY FLOW AT SYSTEM OUTLETS
	PAVING	PROTECTS AREAS WHICH CANNOT OTHERWISE BE PROTECTED, BUT INCREASES RUNOFF VOLUME AND VELOCITY IRREGULAR SURFACE WILL HELP SLOW VELOCITY
	STORM SEWER	SYSTEM REMOVES COLLECTED RUNOFF FROM SITE, PARTICULARLY FROM PAVED AREAS, CAN ACCEPT LARGE CONCENTRATIONS OF RUNOFF CONDUCTS RUNOFF TO MUNICIPAL SEWER SYSTEM OR STABILIZED OUTFALL LOCATION, USE CATCH BASINS TO COLLECT SEDIMENT
	SILT FENCE	USES GEOTEXTILE FABRIC AND POSTS OR POLES. EASY TO CONSTRUCT AND LOCATE AS NECESSARY.

# CONSTRUCTION SCHEDULE

SITE STRIPPING AND LAND BALANCING

- PLACE GEOTEXTILE SILT FENCE (PRIOR TO COMMENCING ANY WORK) - SWEEP STREETS AND PAVEMENT AREAS AS REQUIRED

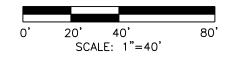

PARKING LOT BASE AND STORM SEWERS - MAINTAIN CONTROL MEASURES AND INSTALL SILT SACKS IN CATCH

BUILDING CONSTRUCTION - MAINTAIN CONTROL MEASURES

FINAL GRADING & PAVING PARKING LOTS - MAINTAIN TEMPORARY CONTROL MEASURES - PLACE RIPRAP - PLACE TOPSOIL SURFACE IN DISTURBED AREAS AND PERMANENT SEEDING PRIOR TO OCT. 1.

TOTAL DISTURBANCE AREA = 3.8 ACRES

Union Township Site Plan Review

Tuesday December 10, 2019

Mt Pleasant Storage Central, LLC

4263 Corporate DR Mt. Pleasant, MI 48858

A Site Plan Review was conducted on Thursday December 5, 2019 and revealed the following requirements listed below.

ORDER TO COMPLY: Since these conditions are contrary to code, you must correct them upon receipt of this notice. Please provide our department the documentation that verifies compliance with the code.

This list shall not be considered all-inclusive, as other requirements may be neccessary, additional requirements are located in Chapter 5 and appendixes B, C, and D of the 2012 Edition of the International Fire Code.

If you have any questions regarding this matter, please feel free to contact me at (989) 779-5122.

#### Violation Code

1 PROPERTY Identification

Mt. Pleasant Storage Central, LLC
4263 Corporate Dr
Mt. Pleasant, MI 48858

Proposed additional buildings to an existing mini self storage units. ACCESS AND WATER Road and Water Supply

When fire apparatus access roads or water supply for fire protection is required to be installed, such protection shall be installed and made serviceable prior to and during the time of construction except when approved alternative methods of protection are provided. Temporary street signs shall be installed at each street intersection when construction of new roadways allows passage by vehicles in accordance with Section 505.2 of the 2012 Edition of the International Fire Code.

ACCESS ROAD 150 FT Buildings within 150ft of Access Road

All portions of a building are required to be within 150 feet of an approved Fire Department access road, in accordance with Chapter 5, Section 503.1.1 of the 2012 Edition of the International Fire Code.

Site plan meets requirements.

ACCESS ROAD LOAD Designed and Maintained to Support the All fire apparatus access roads shall be designed and maintained to support the imposed loads of fire apparatus and shall be surfaced so as to provide allweather driving capabilities in accordance with Chapter 5, Sections 503.2.3 and 503.4 of the 2012 Edition of the International Fire Code.

ACCESS ROAD OBSTRUCTED Dimensions and Clearances

All fire apparatus access roads, including parking lots, shall have an unobstructed width of not less than 20 feet and an unobstructed vertical clearance of not less than 13 feet 6 inches in accordance with Chapter 5, Sections 503.2.1, 503.2.2, 503.3 and 503.4 of the 2012 Edition of the International Fire Code. Fire Prevention Ordinance 93.02(D)

ACCESS ROAD TURN AROUND Turn Around Required when Road in

Provide an approved turn around for dead end fire apparatus access roads in excess of 150' in Length in accordance with Chapter 5, Section 503.2.5 and appendix D, Section D103.4 of the 2012 Edition of the International Fire Code.

Site plan meets requirements.

BUILDING IDENTIFICATION Buildings Shall Have Address

Provide address identification numbers in accordance with Chapter 5, Sections 505.1 of the 2012 Edition of the International Fire Code or applicable to the City of Mt. Pleasant code of ordinances 150.01 Land Usage.

Site will have visible address from road access.

HYDRANT DISTANCE Hydrant maximum distance from buildings

Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided where required by the fire code official. Exceptions: 1. For Group R-3 and Group U occupancies, the distance requirement shall be 600 feet (183 m). 2. For buildings equipped throughout with an approved automatic sprinkler system installed in accordance with Section 903.3.1.1 or 903.3.1.2, the distance requirement shall be 600 feet (183 m).

Site plan shows new hydrant to meet above requirements.

WATER SUPPLY (GPM) Capable of Supplying the Required Fire

Provide fire hydrants capable of supplying the required fire flow in accordance with Chapter 5, Section 507 of the 2012 Edition of the International Fire Code.

The number and spacing of fire hydrants is based on the construction type and square footage of the building in accordance with Appendix B and C and tables B105.1 and C105.1 of the 2012 Edition of the International Fire Code. (Contact Fire Department to verify locations.)

Proposed steel type buildings with the largest building at 9,000sq. ft. The required fire flow is 2,000gpm. Two hydrants required with a maximum distance of 450' between hydrants. With the location of the new required hydrant the south or east public hydrant meets the 450' spacing.

KNOX BOX Knox Box Requirements and Location

Provide a Knox Key entry device and install it in approved location by the Fire Code Official, as in accordance with Chapter 5, Section 506.1, 506.1.1 and 506.2 of the 2012 Edition of the International Fire Code. (Go to Knoxbox.com and search by fire department or zip code - select "Mt. Pleasant Fire Department" and place order for the type of Knox box desired.)

Install a fire department knox box on location at the required placement location of the fire department.

Keeler, Randy Lieutenant Mount Pleasant Fire Department Jennifer, Please add to packet.

Copied Pete because it doesn't look like Rick did in his reply.

Subject: RE: Mt Pleasant Storage LLC Site Plan

### Peter,

Good afternoon, the site plan for parcel (s) number 14-011-30-002-01 & 14-011-30-001-14/Mt. Pleasant Storage Central, LLC located 4263 Corporate Drive, was provided to the Public Service Department on December 10, 2019 via email. These comments pertain to site plan approval only.

The storage units indicated on the site plan are not serviced by Township water and do not have Township sewer service available. The Mt. Pleasant Fire Department is requiring that one (1) hydrant be installed onsite. Prior to permits being issued for this project the full plans, profiles, and specifications for the water extension will be reviewed, and approved by the Township Department of Public Services. In accordance with the City of Mt. Pleasant Fire Department Requirements the water extension shall be installed and made serviceable prior to and during the time of construction except when approved alternative methods of protection are provided.

Thank you,

# Kim Smith

Subject: Mt Pleasant Storage LLC Site Plan

Peter,

Good morning, I received a copy of the site plan for the Mt Pleasant Storage LLC project on December 9, 2019. I did not receive a copy of the Wellhead Protection paperwork that should have accompanied the site plan submitted to your office. Did you receive the Wellhead Protection paperwork with this site plan submittal? If it was included please forward a copy to the Public Services Department for review.

Thank you,

RE: Storm Water Management Plan for the Mt Pleasant Storage Central, LLC - Site Addition

Dear Mr. Galliant:

I have reviewed the Storm Water Management Plan prepared by Pete Lorenz, P.E., of Lorenz Surveying & Engineering, Inc., dated Dec. 6, 2019, for the above captioned project located in part of the NE ¼ of SW ¼ of Section 11, Union Township, located between Corporate Drive and Park Place. The proposed plan is consistent with the Union Township Storm Water Ordinance.

If you have any questions or need any further information, please feel free to contact me.

Sincerely,

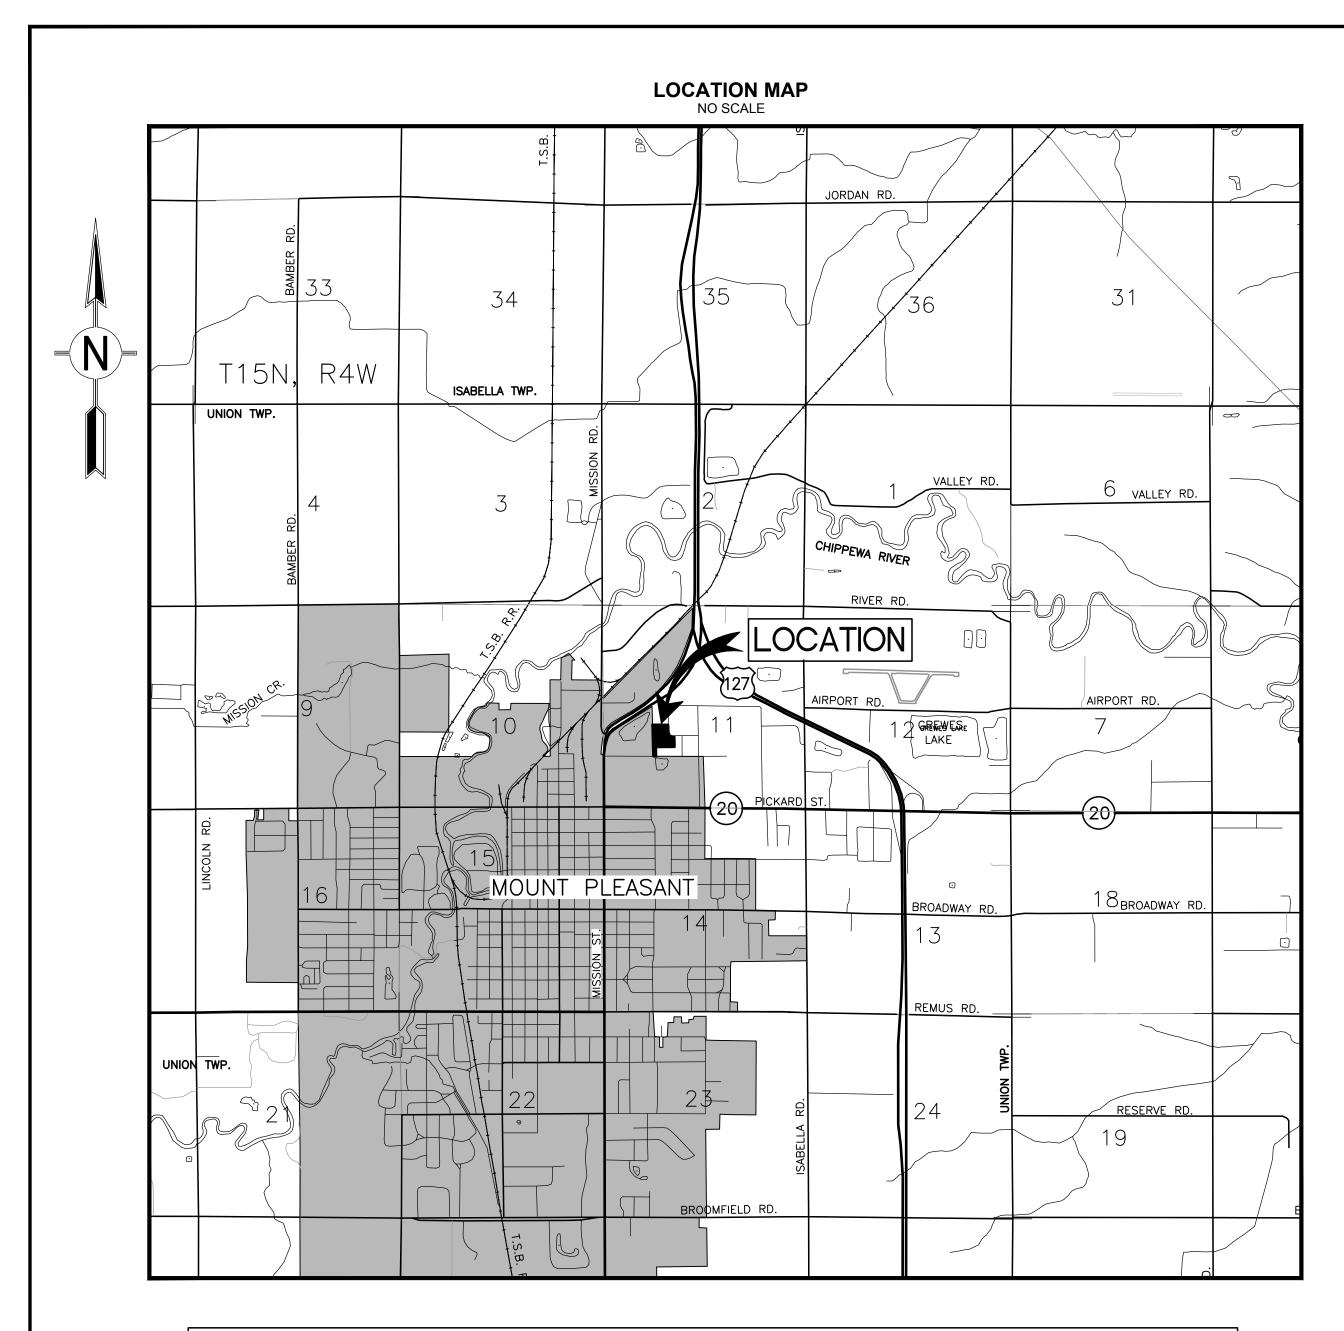

¢

Bruce & Rohrer Bruce E. Rohrer, P.E.

NEW BUSINESS

# SUBJECT:D) SPR 2019-16 Isabella County Road Commission Facilities located at 2261 EREMUS RD MOUNT PLEASANT, MI PID 14-016-30-003-00 48858 Owner: ISABELLA COUNTYROAD COMMISSION

Applicant: Isabella County Road Commission Owner: ISABELLA COUNTY ROAD COMMISSION Location: 2261 E REMUS RD. MOUNT PLEASANT MI 48858 Current Zoning: B5

Adjacent Zoning: R-2A, B-5, CZ (Civic MP City)

**Future Land Use/Intent:** *Commercial/Light Industrial:* This district is intended for a blend of medium intensity commercial and small-scale light industrial uses. Light industrial uses include but are not limited to small-scale manufacturing, laboratories, R&D (research and development) firms, information technology firms, or other businesses that might be found in a technology park.

Current Use: Essential Services: Isabella County Rd. Commission.

**<u>Reason for Request</u>**: Construct new Road Commission facilities including Administration Buildings and Maintenance building.

**History:** Applicant applied for a Public and Institutional Special use for new facilities on a vacant property on S. Lincoln Rd in December of 2018. Following the Planning Commission's recommendation to NOT approve the application. Applicant applied for a Text Interpretation from the ZBA in February of this year. The ZBA determined that the ICRC is an essential service. At this time the project has received all outside agency approvals. MPFD, ICRC, ICTC, Isabella County Drain Office for Stormwater Management and Union Township Utilities.

**Objective of board:** Review section 12 of the Zoning Ordinance. The Planning Commission shall study the site plan and shall, within sixty days of its submittal to the Zoning Official, either approve or disapprove the proposed site plan. If the site plan is disapproved, the reasons for disapproval shall be stated. Upon approval of a site plan, at least two copies of the site plan as finally approved shall be signed and dated by the Secretary of the Planning Commission.

# **Recommendation from Township Planner**

At this time I would approve SPR 2019-16.

PERMIT INFORMATION - DEQ Check List		
SITE PLAN REQUIREMENTS	I Of	Comments - (also indicate any features which will not be included in the development or are not applicable)
Name and addresses of Property Owner Name and Address of Applicant	x	
Provide Construction Type (per Mi Building Code) and if sprinkled, (assume Type IVb, un-sprinkled if	x	IIb, Fully sprinkled - NFPA 13

The date, north arrow and scale. The scale shall be not less than $1''=20'$ for property under three (3) acres and not more than $1''=40'$ for property greater than three acres.	x	Drawings for the board printed on 11x17, these will not be to scale
All lot and/or property lines are to be shown and dimensioned, including building setback lines	x	
The location and dimensions of all existing and proposed: fire hydrants (within 400 feet of building) drives,	×	
Include Sign size, height, and design. Canopy heights extending over driveways accommodate Public Transportation	x	
Source of utilities. Public water and sewer approval by Union Township Utility Coordinator prior to application.		Note: Union Township policy is to issue sewer and water permits after application for a building permit. Applicant is advised to contact the utility department for availability prior to site plan review. The township does not coordinate other utility matters. Applicant to assure himself that site is suitable for septic systems, contact Central Michigan District Health Department
All dumpsters shall be screened from public view with an opaque fence or wall no less than six feet in height. Show location. (Note most refuse contractors require concrete pad to place dumpsters upon)	x	
The location and right-of-way width of all abutting roads, streets, alleys and easements.	x	
A locational sketch drawn to scale giving the section number and the nearest crossroads.	x	

The zoning of the subject property and the abutting properties.	x	
The location, height and type of fences and walls.	X	
The location and detailed description of landscaping.	X	
For multiple family and mobile home parks, contour intervals shall be shown (two foot intervals for average slopes ten percent and under and five foot intervals for slopes over ten percent). Topography, however, is encouraged to be shown on all site plans.	x	
The location of all existing and proposed structures on and within one hundred feet of the subject property's boundary.	x	
For apartments, provide a count of bedrooms per building and total count of bedrooms for the project.		Not applicable

### APPLICANT COMMENTS

I submit the site plan and this application as a true representation of existing and proposed conditions. I agree to install all features as shown and to abide by conditions placed upon approval of this plan by the Union Township Planning Commission . False or inaccurate information placed upon this plan may be cause for revocation of any permits issued pursuant to site plan approval and / or removal of work installed. Any changes to the Site Plan now or in the future must be approved by the Union Township Planning Commission or Zoning Administrator. Approval of this plan shall not constitute the right to violate any provisions of the/Union Township Zoning Ordinance 1991-5, or other applicable building or state codes and or laws.

# SITE PLAN REVIEW HAZARDOUS SUBSTANCES REPORTING FORM

This form must be completed and submitted as part of the site plan for facilities which may use, store, or generate hazardous substances or polluting materials (including petroleum-based products)

Name of busin	ess:	Isabella County Road Commission
Name of busin	ess owner(s):	Isabella County Road Commission
Street and ma	ailing address:	2261 E. Remus Road, Mt Pleasant Mi
Telephone: Fax:	989-773-7	'131
Email:	tcasali@is	sabellaroads.com

### I affirm that the information submitted is accurate.

Owner(s) signature and date:

Information compiled by:

# Part 1: Management of Hazardous Substances and Polluting Materials

1.YN	Will the proposed facility store, use or generate hazardous substances or polluting materials (including petroleum-based products) now or in the future? If yes, please complete this form and submit with your site plan. A
	catalogue and map of natural resources on and near the site, including an assessment of groundwater vulnerability is required to be submitted with
	your plan. All petroleum based products will be stored within the building within a secondary containment area.
2. Y N	on-site?
3. <u>M</u>	Will any hazardous substances or polluting materials be stored on-site? If yes, identify the storage location on the site plan. Describe the size and type of secondary containment structure here or on an attached page. Submit a map and/or diagram of facilities on the site related to groundwater protection, including secondary containment structures, loading/unloading areas, drinking water wells, septic systems, underground storage tanks and storm drain inlets.
4. YN	Will the new underground storage tanks be located less than 2000 feet from a drinking water well serving more than a single household? No underground storage tanks
5. YN	Are existing underground storage tanks on-site less than 200 feet from a drinking water well serving more than a single household? No underground storage tanks
	If the answer to questions 4 or 5 are yes, you may be in violation of the State of Michigan underground storage tank regulations. For specific requirements, please contact the MDEQ Underground Storage Tank Division. District Office Telephone: 989-894-6200 (Saginaw Bay District Office)
6MN	Will the interior of the facility have general purpose floor drains? (general
	purpose floor drains should not be connected to a sanitary sewer system, stormwater drainage system, dry well or septic system). If yes, will the floor drain connect to: (circle one)
	<ul><li>a. on-site holding tank</li><li>b. on-site system</li></ul>
	The on-site system must be approved by the MDEQ.
	Contact: MDEQ Waste Management Division. District Office telephone: 989-894-6200 (Saginaw Bay District Office)
7. YN	Will hazardous substances or polluting materials be stored, used, or handled out- of doors near storm drains which discharge to lakes, streams, or wetlands? If yes, describe the type of catch basin or spill containment facilities which will be used (use an attached sheet with diagram if appropriate).

cc: Charter Township of Union Department of Public Works

# Part II: Types and Quantities of Hazardous Substances and Polluting Materials Used, Stored or Generated On-Site

Please list the hazardous substances and polluting materials (including chemicals, hazardous materials, petroleum products, h azardous wastes and other polluting materials) which are expected to be used, stored or generated on -site. Quantities should reflect the maximum volumes on hand at any time. Attach additional pages if necessary to list all hazardous substances and polluting materials.

Common Name	CHEMICAL NAME (components)	Form	MAX QUANTITY ON HAND AT ONE TIME	TYPE OF STORAGE CONTAINERS
Motor Oil			400 Gallons	AGT inside building
Automatic Transmission Oil			275 Gallons	AGT inside building
Hydraulic Oil			400 Gallons	AGT inside building
Engine Coolant			200 Gallons	AGT inside building
	KEY: LIQ. = liquid P.LIQ = pressurized liquid			KEY: AGT = above ground tank DM = drums
	S = solids G = gas PG = pressurized gas			UGT = underground tank Cy = cylinders CM = metal cylinders CW = wooden or composition container TP = portable tank

# PERMIT INFORMATION

### www.michigan.gov/deqpermits

The Department of Environmental Quality (DEQ) has prepared a list of key questions to help identify what DEQ permits, licenses, or approvals of a permit-like nature may be needed. By contacting the appropriate offices indicated, you will help reduce the possibility that your project or activity will be delayed due to the untimely discovery of additional permitting requirements later in the construction process. While this list covers the existence of permits and approvals required from the DEQ, it is not a comprehensive list of all legal responsibilities. A useful way to learn whether other requirements will apply is to go through the Self-Environmental Assessment in the Michigan Guide to Environmental, Health, and Safety Regulations, online at: <a href="http://www.michigan.gov/ehsguide">http://www.michigan.gov/ehsguide</a>. Please call the Environmental Assistance Center at 800-662-9278 to talk with any of the DEQ programs noted below.

KEY QUESTIONS:	Yes	No	PROGRAM WEBPAGE AND CONTACTS
MISCELLANEOUS CONSTRUCTION			
Air Quality Permit to Install: Will your business involve the installation or construction of any process equipment that has the potential to emit air contaminants (e.g. dry sand blasting, bollers, standby generators)?	Y	N X	Air Quality Division (AQD), Permit Section
Asbestos Notification: Does the project involve renovating or demolishing all or portions of a building? Notification is required for asbestos removal and required for all demolitions even if the structure never contained asbestos.	Y	N X	AQD, Asbestos Program
Land and Water Featured Programs (Water Resources Division) - USACE Consolidated Permits: Please consult the Land and Water Management Decision Tree document to evaluate whether your project needs a land and water management permit (i.e., Does the project involve filling, dredging, placement of structures, draining, or use of a wetland?).	ř	N XI	Water Resources Division (WRD), Joint Permit Application
Soil Erosion and Sedimentation Control: Does the project involve an earth change activity (including land balancing, demolition involving soil movement, and construction)?	Y X	N	Soil Erosion and Construction Storm Water, or Contact your Local Agency
NPDES Storm Water Discharge from Construction Sites Notice of Coverage: Does the project involve construction which will disturb one or more acres that come into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	Y IX	N	NPDES Storm Water Permits Program, or appropriate <u>DEQ District Office</u>
Public Swimming Pool Construction (Spas/Hot Tubs) Permits: Will your business involve the construction or modification of a public swimming pool, spa or hot tub?	Ň	N IX	Public Swimming Pool Program, or appropriate DEQ District Office
Threatened and Endangered Species: Does the project involve activities that would destroy a protected species of plant or animal or disturb a protected animal species?	ř	N IX	Endangered Species Assessment, <u>Threatened and Endangered Species</u> <u>Program</u> , 517-373-1552
Does the project involve <i>construction</i> or alteration of any <i>sewage collection</i> or <i>treatment</i> facility?	ř	N IX	Appropriate District Office, WRD, Part 41 Construction Permit Program
Does the project involve construction of a facility that landfills, transfers, or processes of any type of <i>solid non-hazardous waste</i> on-site, or places <i>industrial residuals/sludge</i> into or onto the ground?	č	N	Office of Waste Management and Radiological Protection (OWMRP), <u>Solid</u> <u>Waste</u> , Appropriate <u>DEQ District Office</u>
Does the project involve the construction of an on-site treatment, storage, or disposal facility for <i>hazardous waste</i> ?	Ľ	N	OWMRP, Hazardous Waste Section, Treatment, Storage and Disposal
WATER SUPPLY (More information, see: <u>http://www.michigan.gov/degw</u>	<u>ater</u> ,	sele	ct "drinking water")
I am buying water from my community water supply (i.e. city of Detroit or Grand Rapids)	Y IX	N	Contact your Local Water Utility
I have a private or other water supply well (Type III)	ľ	N	Contact your (District or County) Local Health Department
I have a Non-Community Water Supply (Type II)	č	N X	Guide, Contact your (District or County) Local Health Department
I am a community water supply (Type I)	Y	NX	Community Water Supply, DEQ District Office Community Water Supply Program

WASTEWATER MANAGEMENT			
Storm Water Discharge to Wetlands: Will storm water be collected, stored, or treated in a wetland area from a public road, industrial, commercial, or multi- unit residential development?	Y	N X	WRD, Joint Permit Application
<u>Great Lakes</u> : Does the project involve construction, filling, or dredging below the Ordinary High Water Mark of one of the Great Lakes?	Y	N	WRD, Joint Permit Application
<u>Inland Lakes and Streams</u> : Does the project involve any dredging, filling, placement of structures, or the operation of a marina within an inland waterbody (e.g. lake, river, stream, drain, creek, ditch, or canal), enlargement of a waterbody, or excavation of a pond within 500 feet of a waterbody?	Y	N Ix	WRD, Joint Permit Application
Storm Water Ponds and Discharges to Inland Lakes/Streams, or Great Lakes: Will storm water from any road or any other part of the development be discharged either directly or ultimately to an inland waterbody, or one of the Great Lakes; or will a storm water pond be constructed within 500 feet of an inland waterbody?	ř	N X	WRD, Joint Permit Application
Does the project involve placement of fill, earth moving, or placement of structures within the 100-year floodplain of a watercourse?	Y	N	WRD, Joint Permit Application
Does the project involve construction of a building or septic system in a designated Great Lakes high risk erosion area?	Y	N	WRD, Shoreland Management
Does the project involve dredging, filling, grading, or other alteration of the soil, vegetation, or natural drainage, or placement of permanent structures in a designated <i>environmental area</i> ?	č	N	WRD, Shoreland Management
Does the project propose any development, construction, silvicultural activities or contour alterations within a designated <i>critical dune area</i> ?	Y	N X	WRD, Sand Dune Management
Does the project involve construction of a <i>dam</i> , weir or other structure to impound flow?	Y	N Ix	WRD, <u>Dam Safety</u> Program
CONSTRUCTION PERMITS (SECTOR SPECIFIC)			
Does the project involve the construction or alteration of a water supply system or sewage disposal system for a manufactured housing project?	Y	N Ix	Office of Drinking Water & Municipal Assistance (ODWMA)
Does the project involve a subdivision or site condominium project utilizing individual on-site subsurface disposal systems or individual wells?	Y	N Ix	ODWMA
Does the project involve the construction or modification of a campground?	Y	N	ODWMA, Campgrounds program
Does the project involve the construction or modification of a public swimming pool?	ř	N lx	ODWMA, Swimming pools program
OPERATIONAL PERMITS	常行		
Renewable Operating Permit: Does your facility have the potential to emit any of the following: 100 tons per year or more of any criteria pollutant; 10 tons per year or more of any hazardous air pollutant; or 25 tons per year or more of any combination of hazardous air pollutants?	ř	N X	AQD, Permit Section
NPDES: Does the project involve the discharge of any type of wastewater to a storm sewer, drain, lake, stream, or other surface water?	Y	N IX	WRD, Appropriate <u>DEQ District Office</u> , or <u>National Pollutant Discharge Elimination</u> (NPDES) Permit Program
Does the facility have industrial activity that comes into contact with storm water that enters a storm sewer, drain, lake, stream, or other surface water?	Y	NX	WRD, <u>Permits Section</u> , or appropriate <u>DEQ</u> <u>District Office</u>
Does the project involve the discharge of wastewaters into or onto the ground (e.g. subsurface disposal or irrigation)?	Y	N X	WRD, Groundwater Permits Program
Does the project involve the drilling or deepening of wells for waste disposal?	Y	N X	Office of Oil, Gas and Minerals (OOGM)
Does the project involve landfilling, transferring, or processing of any type of solid non-hazardous waste on-site, or placing industrial residuals/sludge into or onto the ground?	Y	N	OWMRP or Appropriate DEQ District Office

	1		1	
Does the project involve the on-site treatment, storage, or disposal of hazardous waste?	Y	N X	(AMADD Hererdeus and Liquid Meete	
Does the project require a site identification number (EPA number) for regulated waste activities (used oil, liquid waste, hazardous waste, universal waste, PCBs)? (Web Site)	Y	N XI	OWMRP, Appropriate DEQ District Office	
Does the project involve the receipt, possession, manufacture, use, storage, transport, transfer, release, or disposal of radioactive material in any form?	Ľ	N X	OWMRP, <u>Radioactive Material and</u> Standards Unit	
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have radioactive levels above background?	Y	NX	OWMRP Radioactive Material and Standards Unit	
Do you desire to develop a withdrawal of over 2,000,000 gallons of water per day from any source other than the Great Lakes and their connecting waterways? Or, do you desire to develop a withdrawal of over 5,000,000 gallons of water per day from the Great Lakes or their connecting waterways?	Ľ	NiX	WRD, DWEHS, <u>Source Water Protection</u> <u>Unit</u>	
CHEMICAL ADDITION PROJECTS				
Are you using chemicals or materials in, or in contact with, drinking water at any point in the water works system?	Y	NX	WRD, Appropriate <u>DEQ District Office</u> , <u>Public Water Supply Program</u>	
Are you applying a chemical treatment for the purpose of aquatic nuisance control (pesticide/herbicide etc) in a water body (i.e. lake, pond or river)? (5.	ř	N IX	WRD, <u>Aquatic Nuisance Control</u> and Remedial Action Unit	
Are you applying materials to a water body for a water resource management project (i.e. mosquito control treatments, dye testing, or fish reclamation projects)?	ř	N X	WRD, Surface Water Assessment Section	
OPERATIONAL PERMITS (SECTOR SPECIFIC)				
Does the project involve the transport of some other facility's non-hazardous liquid waste?	ř	N XI	OWMRP, Transporter Program	
Does the project involve the transport hazardous waste?	ř	N IX	OWMRP, Transporter Program	
Does your facility have an electric generating unit that sells electricity to the grid and burns a fossil fuel?	ř	N X	AQD, Acid Rain Permit Program	
Is the project a dry cleaning establishment utilizing perchloroethylene or a flammable solvent in the cleaning process?	č	N	DEQ, AQD, Dry Cleaning Program	
Does your laboratory test potable water as required for compliance and monitoring purposes of the Safe Drinking Water Act?	ľ	N X]	DEQ, Laboratory Services Certifications	
Does the project involve the generation of medical waste or a facility that treats medical waste prior to its disposal?	ř	NX	OWMRP, Medical Waste Regulatory Program	
Does the project involve transport of septic tank, cesspool, or dry well contents or the discharge of septage or sewage sludge into or onto the ground?	ř	N IX	ODWMA, Septage Program	
Do you store, haul, shred or process scrap tires?	ř	N X]	OWMRP, Scrap Tire Program	
Does the project involve the operation of a public swimming pool?	Y	N [X	ODWMA, Public Swimming Pools Program	
Does the project involve the operation of a campground?	Y	N IX	ODWMA, <u>Campgrounds</u>	
Do you engage in the business of hauling bulk water for drinking or household purposes (except for your own household use)?	Y	N X	ODWMA, Water Hauler Information	
PERSONAL LICENSES/CERTIFICATIONS				
Are you designated by your facility to be the Certified Operator to fulfill the requirements of a wastewater discharge permit (NPDES including Storm	ľ	N X]	WRD, <u>Operator Training, Storm Water</u> Program	

Water or Groundwater)?			
Are you a drinking water operator in charge of a water treatment or water distribution system, back-up operator, or shift operator?	Y	N XI	WRD, Operator Training
Are you a water-well drilling contractor, pump installer, dewatering well contractor or dewatering well pump installer?	Y	N X	WRD, Well Construction Unit
OIL, GAS AND MINERALS			
Do you want to operate a central production facility (applies to oil and gas production facilities where products of diverse ownership are commingled)?	Y	N X	OOGM, Petroleum Geology and Production
Does the project involve the removal of sand from a sand dune area within two (2) miles of a Great Lakes shoreline?	Y	N X	OOGM, Minerals and Mapping Unit, <u>Sand</u> Dune Mining Program
Does the project involve the diversion and control of water for the mining and processing of low-grade iron ore?	Y	N IX	OOGM, Minerals and Mapping
Does the project involve the surface or open-pit mining of metallic mineral deposits?	Y	N X	OOGM, Minerals and Mapping
Does the project involve the mining of <b>nonferrous mineral deposits</b> at the surface or in underground mines?	Y	N Xİ	OOGM, Minerals and Mapping
Does the project involve mining coal?	Y	N X	OOGM, Minerals and Mapping
Do you want to change the status of an oil or gas well (i.e. plug the well)?	Y	N X]	OOGM, Permits and Bonding Unit
Does the project involve drilling of oll, gas, brine disposal, secondary recovery, or hydrocarbon storage wells?	Y	N IX	OOGM, Permits and Bonding Unit
Does the project involve plugging or deepening of an oil or gas well, or conveying rights in the well as an owner to another person?	Y	N X	OOGM, Permits and Bonding Unit
Does the project involve changing the status or plugging of a mineral well?	Y	N [X	OOGM, Minerals and Mapping
Does the project involve the drilling or deepening of wells for brine production, solution mining, storage, or as test wells?	ř	N	OOGM, Minerals and Mapping
Does the project involve decommissioning or decontamination of tanks, piping, and/or appurtenances that may have <b>radioactive levels</b> above background?	ř	N IX	OWMRP, Radioactive Protection Programs
STORAGE TANKS (CONSTRUCTION AND OPERATION)			
Does the project involve the installation of an aboveground storage tank for a flammable or combustible liquid (under 200 degrees Fahrenheit)?	Y	NX	Michigan Department of Licensing and Regulatory Affairs (DLARA) - <u>Storage Tank</u> Unit, 517-335-7211
Does the project involve the installation of a compressed natural gas dispensing station with storage?	ř	N X	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the installation of a <b>liquefied petroleum gas</b> container filling location or storage location that has a tank with a capacity of more than 2,000 gallons or has two (2) or more tanks with an aggregate capacity of more than 4,000 gallons?	ř	N X	DLARA - <u>Storage Tank Unit,</u> 517-335-7211
Does the project involve the installation, removal, or upgrade of an underground storage tank containing a petroleum product or a hazardous substance?	ř	N X	DLARA - <u>Storage Tank Unit.</u> 517-335-7211
Does the project involve the Installation of a hydrogen system?	Y	N X	DLARA - Storage Tank Unit, 517-335-7211

Subject: RE: Isabella County Road Commission - Site Plan

Peter,

MDOT has reviewed the site plan for the Isabella County Road Commission. We will allow the proposed driveway changes that Pat showed us. Once the site plan is finalized we will need a permit from the Isabella County Road Commission. We will have a construction project in this location next summer. As we discussed with Pat if he can have his drives removed and the new ones installed prior to our contractor being ready to pave we should be able to pave up to the new curb. We will be unable to slow our contractor down or create more work for them so the Isabella County Road Commission will need to coordinate closely with them.

If you have any questions or concerns please let me know.

Thanks, Ben

# Mount Pleasant Fire Department 804 E. High Street Mount Pleasant, Mi 48858

Union Township Site Plan Review

Tuesday December 10, 2019

Isabella County Road Commission 2261 E Remus RD Mt. Pleasant, MI 48858

A Site Plan Review was conducted on Tuesday December 10, 2019 and revealed the following requirements listed below.

ORDER TO COMPLY: Since these conditions are contrary to code, you must correct them upon receipt of this notice. Please provide our department the documentation that verifies compliance with the code.

This list shall not be considered all-inclusive, as other requirements may be neccessary, additional requirements are located in Chapter 5 and appendixes B, C, and D of the 2012 Edition of the International Fire Code.

If you have any questions regarding this matter, please feel free to contact me at (989) 779-5122.

### Violation Code

1 PROPERTY Identification

Isabella County Road Commission 2261 E Remus Rd

Scope of project: Proposed: 49,530sq. ft. maintenance building and 8,469sq. ft. administration building.

ACCESS AND WATER Road and Water Supply

When fire apparatus access roads or water supply for fire protection is required to be installed, such protection shall be installed and made serviceable prior to and during the time of construction except when approved alternative methods of protection are provided. Temporary street signs shall be installed at each street intersection when construction of new roadways allows passage by vehicles in accordance with Section 505.2 of the 2012 Edition of the International Fire Code.

ACCESS ROAD 150 FT Buildings within 150ft of Access Road

All portions of a building are required to be within 150 feet of an approved Fire Department access road, in accordance with Chapter 5, Section 503.1.1 of the 2012 Edition of the International Fire Code.

Site plan meets requirements above.

\_\_\_\_\_

ACCESS ROAD LOAD Designed and Maintained to Support the All fire apparatus access roads shall be designed and maintained to support the imposed loads of fire apparatus and shall be surfaced so as to provide allweather driving capabilities in accordance with Chapter 5, Sections 503.2.3 and 503.4 of the 2012 Edition of the International Fire Code.

ACCESS ROAD OBSTRUCTED Dimensions and Clearances

All fire apparatus access roads, including parking lots, shall have an unobstructed width of not less than 20 feet and an unobstructed vertical clearance of not less than 13 feet 6 inches in accordance with Chapter 5, Sections 503.2.1, 503.2.2, 503.3 and 503.4 of the 2012 Edition of the International Fire Code. Fire Prevention Ordinance 93.02(D)

ACCESS ROAD W/HYDRANT Width of Road with a Fire Hydrant

Where a fire hydrant is located on a fire department apparatus access road, the minimum road width shall be 26 feet, exclusive of shoulders as in accordance with Appendix D, Section D103.1 of the 2012 Edition of the International Fire Code.

Site plan meets requirements above.

AERIAL ACCESS PROXIMITY Proximity to building

At least one of the required access routes meeting this condition shall be located within a minimum of 15 feet and a maximum of 30 feet from the building, and shall be positioned parallel to one entire side of the building. The side of the building on which the aerial fire apparatus access road is positioned shall be approved by the fire code official as in accordance with Appendix D, Section D 105.3 of the 2012 Edition of the International Fire Code.

Site plan meets requirements.

BUILDING IDENTIFICATION Buildings Shall Have Address

Provide address identification numbers in accordance with Chapter 5, Sections 505.1 of the 2012 Edition of the International Fire Code or applicable to the City of Mt. Pleasant code of ordinances 150.01 Land Usage.

FDC HORN STROBE Horn Strobe Above FDC

Provide a horn strobe above the Fire Department Connection. Fire Prevention Ordinance 93.12(A)

FDC LOCATION FDC Location and Distance

Fire Department connections shall be located on the street side of buildings, fully visible and recognizable from the street or nearest point of fire department vehicle access or as other wise approved by the fire chief. The fire department connection shall be located within 150 feet of a fire hydrant , in

accordance with Chapter 9, Section 912.2.1 of the 2012 Edition of the International Fire Code and the Fire Prevention Ordinance 93.12 Provide a 5" Storz Fire Department Connection with a 30 degree downturn.

Location of FDC on sitel plan meets requirements above.

### FDC MAINTENANCE FDC Maintained and Unobstructed

Immediate access to fire department connections shall be maintained at all times and without obstruction by fences, bushes, trees, walls or any other fixed or moveable object. Access to fire department connections shall be approved by the fire chief as in accordance with Chapter 9, Section 912.3 of the 2012 Edition of the International Fire Code.

HYDRANT DISTANCE Hydrant maximum distance from buildings

Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road, as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided where required by the fire code official. Exceptions: 1. For Group R-3 and Group U occupancies, the distance requirement shall be 600 feet (183 m). 2. For buildings equipped throughout with an approved automatic sprinkler system installed in accordance with Section 903.3.1.1 or 903.3.1.2, the distance requirement shall be 600 feet (183 m).

Site plan meets above requirements. KNOX BOX Knox Box Requirements and Location

Provide a Knox Key entry device and install it in approved location by the Fire Code Official, as in accordance with Chapter 5, Section 506.1, 506.1.1 and 506.2 of the 2012 Edition of the International Fire Code. (Go to Knoxbox.com and search by fire department or zip code - select "Mt. Pleasant Fire Department" and place order for the type of Knox box desired.)

Requiring three knoxbox locations. One at the east entrance gate and the other two knoxboxes to be located at the north two entrance gates.

WATER SUPPLY (GPM) Capable of Supplying the Required Fire

Provide fire hydrants capable of supplying the required fire flow in accordance with Chapter 5, Section 507 of the 2012 Edition of the International Fire Code. The number and spacing of fire hydrants is based on the construction type and square footage of the building in accordance with Appendix B and C and tables B105.1 and C105.1 of the 2012 Edition of the International Fire Code. (Contact

Fire Department to verify locations.)

The fire flow is based on the largest building of 49,530sq. ft. Total fire flow required is 4,750gpm. A 50% reduction is allowed for a sprinkled building leaving the total fire flow at 2,375gpm. Three hydrants are required for fire flow with an average spacing of 450'. Two of the existing public hydrants on Remus Road and the new proposed hydrant meet the requirement for fire flow. The average spacing is 236' + 550' = 786'/2 = 393' < 450'. Site plan meets fire flow requirements.

RE: Storm Water Management Plan for the ICRC Redevelopment project

Dear Mr. Galliant:

I have reviewed the Storm Water Management Plan prepared by Joseph White, P.E., of Wolverine Engineering, dated Dec. 3, 2019, for the above captioned project located in part of the SW ¼ of Section 16, Union Township, located at 2261 East Remus Road. The proposed plan is consistent with the Union Township Storm Water Ordinance.

If you have any questions or need any further information, please feel free to contact me.

Sincerely,

s,

Bruce E Rohnar

Subject: RE: Isabella County Road Commission Site Plan Review

Peter,

Good morning, the site plan for the Isabella County Road Commission located at 2261 E Remus Road was provided to the Public Service Department on December 9, 2019. These comments pertain to site plan approval only.

The Isabella County Road Commission is currently serviced by Township water and sanitary sewer service. The Mt. Pleasant Fire Department is requiring that one (1) hydrant be installed onsite and fire suppression be provided in the building. The additional capacity requirements for water and sewer at the new facility will require that new water and sewer leads be installed to the new facility. The layout provided for the water and sewer extensions provided on the site plan are acceptable.

Prior to permits being issued for this project the full plans, profiles, and specifications for the water extension and sewer service will be reviewed, and is required to be approved by the Township Department of Public Services. In accordance with the City of Mt. Pleasant Fire Department Requirements the water extension shall be installed and made serviceable prior to and during the time of construction except when approved alternative methods of protection are provided.

Thank you,

# Kim Smith

Subject: Isabella County Road Commission Site Plan Review

Peter,

Good morning, I received a copy of the site plan for the Isabella County Road Commission project on December 9, 2019. I did not receive a copy of the Wellhead Protection paperwork that should have accompanied the site plan submitted to your office. Did you receive the Wellhead Protection paperwork with this site plan submittal? If it was included please forward a copy to the Public Services Department for review.

Thank you,

0.30" MAX. OPENING

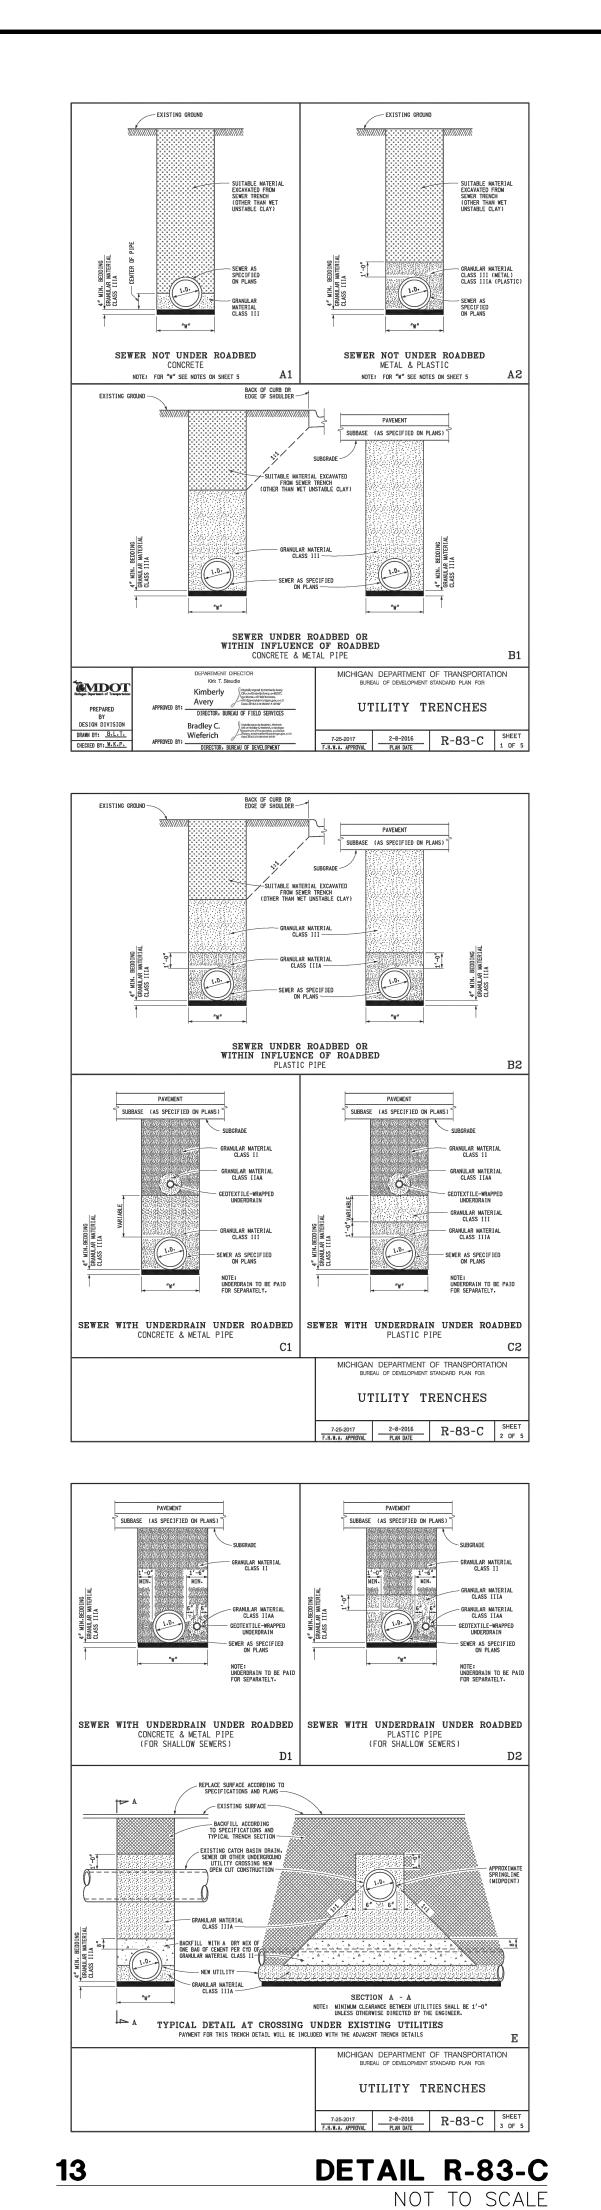

RODENT SCREEN

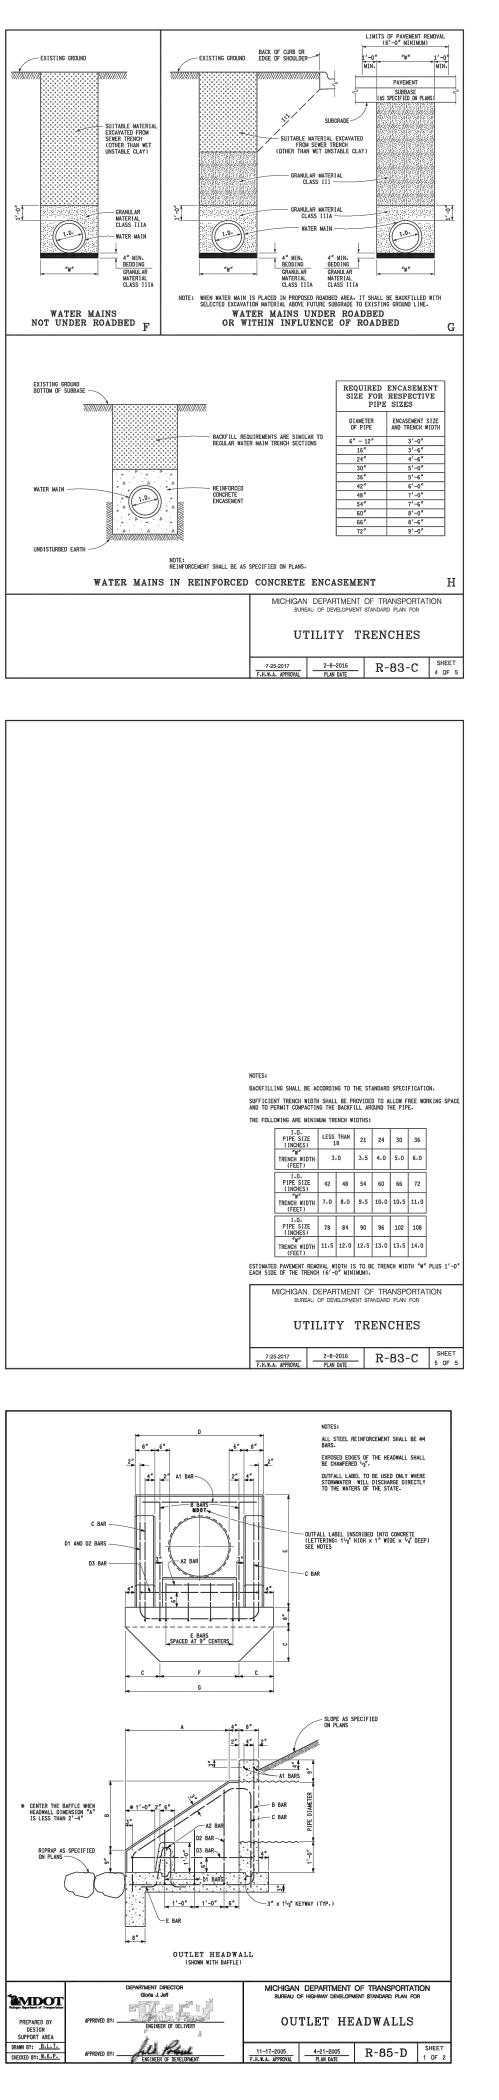

THE CONCRETE RING OR CONCRETE END SECTION SHALL BE CAST AROUND THE SAME TYPE OF PIPE AS THAT USED FOR UNDERDRAIN OUTLET PIPE. STEEL END SECTIONS SHALL BE ATTACHED TO THE ENDS OF CORRUGATED META PIPE AS SPECIFIED ON THIS STANDARD PLAN, BY STANDARD METAL BANDS OR BY OTHER CONNECTING DEVICES AS APPROVED BY THE ENGINEER. STEEL END SECTIONS MAY ALSO BE ATTACHED TO THE ENDS OF PVC OUTLE PIPE AS APPROVED BY THE ENGINEER BY USING A PVC ADAPTER THAT PROVIDES SIMILAR RESISTANCE TO MOVEMENT OF THE CONNECTION DEVICE AS THAT PROVIDED BY STEEL PIPE CORNECTIONS. OUTLEET ATTACHMENT OF THE STEEL END SECTION TO END OF STANDARD PVC OUTLET PIPE IS NOT ACCEPTABLE. HELICALLY CORRUGATED PIPE (EXCEPT PERFORATED PIPE) SHALL HAVE TH ENDS OF THE PIPE REROLLED TO FORM ANNULAR CORRUGATIONS FO CONNECTING THE END SECTION.
